KONICA MINOLTA

**Office system** bizhub 350

bizhub 350
Your black-and-white office professional

The essentials of imaging

The one-stop
office solution

One specialised device for all your needs. High quality, high-resolution black-and-white prints and copies, fast scans and flexible paper handling and finishing capabilities are the ingredients that went into producing the new bizhub 350.
With a speed of 35 A4 images per minute, this compact network copier, printer, and high-speed scanner with optional fax functions is designed especially with the needs of mid-sized offices and departments in mind. If you have a variety of desktop printers and other devices scattered around your workplace, you should examine the many useful features of the multifunctional bizhub 350.

Not only does this versatile and easy to operate device do the work of many different machines, proven state-of-the-art technology like Konica Minolta's extra fine polymerised toner Simitri™ guarantees crisp high-quality black-and-white prints and copies. Your office workflow and efficiency will also benefit from its communication and networking capabilities as well as its sophisticated finishing, IT, and security features.
Let a professional do the job!

➔ Professional support features

Konica Minolta's pioneering Emperon™ print controller powers the comprehensive printing functions provided by the bizhub 350. PCL 5e/6 and PostScript 3 are standard and it supports useful features like the Secure Print function, which ensures that print jobs are only released after the correct password is entered at the machine.

■ The standard web utilities provide automatic instant information on machine configuration, network settings and paper levels, for example.

■ The optional Super G3 fax offers high-speed faxing and fully digitised processing. It assures confidential fax transmission and receipt and provides for practical features like automatic routing, fax poll boxes, PC fax printing, quick memory/batch transmission as well as optional dual line support for the simultaneous transmission and receipt of faxes.
One compact device

Many professional

- With up to 70 originals per minute, the new bizhub 350 offers high-speed scanning capabilities that make easy central scanning in any network direction you need possible. It also features many different versatile functions that simplify workflow as well as internal and external office communications.

- You can now easily scan complex documents using the optional feeder and transmit them via eMail or send them to your PC or network server in PDF or TIFF format.

- LDAP (Lightweight Directory Access Protocol) support provides you with direct access to your company's eMail database, saving you the hassle of re-entering all addresses manually.
Professional handling and finishing

The entire range of Konica Minolta's bizhub devices are specialists in practical and easy operations: The bizhub 350 is no exception. It is designed to increase office workflow, save time, and lower costs.

- Paper and toner can be refilled on the fly, so the printing and copying functions never have to be interrupted.

- By adding one of the various paper cabinet options, the standard paper supply of 1,150 sheets can be increased to a maximum of 3,650 sheets.

- A wide range of specialised tasks useful for communications and presentations can be conveniently done in your workplace, saving the costs of outsourcing. With the bizhub 350, you can process on paper ranging from the postcard size A6 up to A3 for charts. Even envelopes can be fed from the bypass.

- You can also select paper from 50 g/m^2 up to 210 g/m^2, which means that you can easily produce a wide variety of top quality printed matter to meet all your business needs.

- The bizhub 350 provides extensive finishing alternatives ranging from offset sorting, mail-bin-sorting, multi-position stapling, punching, up to complete booklet production.

Professional administrative
features

The far-reaching PageScope software utilities provided with the bizhub 350 are especially designed to make countless daily business operations more convenient, enhance work-flow, and improve device administration.

- The bizhub 350's Network Utility PageScope Web Connection simplifies controlling and administering device settings via a standard web browser. No additional software is necessary.

- With the document handling software Page-Scope Workware, merging, converting, for-warding and scanning of documents becomes child's play. Its file structure depicting miniature thumbnails of filed documents allows users to view files without opening the application.

- You can set up accounts to store and manage your files. This serves as an efficient cost control tool by allowing the administrator to limit print volumes.
