Slim profile, unique design

With its innovative and space-saving vertical J-Path design the DR-C125 sets a new standard for ultra-compact desktop scanners.

The vertical J-Path design allows documents to be fed and received vertically, so no extra desk space is required. Side-mounted cables and ports let you place the DR-C125 directly against a rear wall, or even on a shelf, for the ultimate in space-saving convenience.

Boosting your productivity

To reduce delays and keep production levels high the DR-C125 offers easy 'one-touch' scanning. Pressing the scanner's start button boots up your CaptureOnTouch software application and gets you ready to scan in seconds.

Fast, high quality scanning

The DR-C125 delivers impressive duplex scanning speeds of up to 25ppm/50ipm at 300dpi. Equipped with a CMOS CIS (Contact Image Sensor) unit; high quality images can be produced allowing better text readability for enhanced OCR accuracy.

Extremely versatile and reliable

The DR-C125 can handle a varied mix of document types. By switching the DR-C125 paper feeding to straight-through path you can scan A3 sized documents (in Folio mode), thick documents, embossed cards and 3 metre long documents with ease. The reliable ultrasonic Double Feed Detection feature accurately detects when more than one sheet is fed simultaneously, which can prevent important information from being lost or missed.

Simple, intuitive scanning

The DR-C125 has been designed to encourage easy scanning with an array of intuitive features. The Full Auto Mode feature automatically applies the best settings for key document parameters – including text orientation, page size detection, colour, resolution and skip blank page. This feature saves you time and effort, and enables quick scanning with minimal fuss.

Canon takes innovation forward with the DR-C125's intuitive natural feeding concept. This allows users to feed documents into the scanner face up, in their natural orientation, to help reduce document loading errors and save valuable time.

Capture OnTouch

Mac OS

CaptureOnTouch has been redesigned with a more intuitive and streamlined interface that enables even first time scanner users to scan with ease

- **Add OCR data to your PDF images**

You can perform full-text searches on your saved documents by capturing OCR information during scanning and adding it to your PDF files for later retrieval.

- **Support for PDF/A standard**

Scan PDF files to PDF/A format – the international standard for long-term electronic document archiving.

- **Scan direct to SharePoint and Evernote**

CaptureOnTouch includes a 'scan-to' job button where you can upload scanned documents and images directly to popular collaboration and data management applications.

- **Scan to multiple file formats**

Users can quickly convert their paper documents to multiple file formats – PDF, TIFF, JPEG, BMP and PowerPoint.

Powerful software built for integration and performance

The DR-C125 is a hybrid scanner which accommodates both Mac and Windows users. It is bundled with a great range of software to boost your productivity.
