Easy-To-Use Wireless Adapter and Battery Pack

The WU10 Wireless Adapter and Battery Pack is a device that expands the connectivity and mobility of Canon imageFORMULA mobile document scanners.

Wide Variety of Applications

The WU10 Wireless Adapter and Battery Pack, when used with an imageFORMULA P-Series mobile document scanner, creates an ideal solution for general purpose distributed scanning in multiple computing environments and locales. Individuals can use it to scan documents in Windows® or Mac® office environments and to Android® devices on the road or at home.

Easy To Use, Increases Flexibility

The WU10 Wireless Adapter and Battery Pack easily attaches to any Canon imageFORMULA P-Series mobile document scanner via a USB cable. It can create a wireless connection between the scanner and various types of computing devices. This facilitates sharing the attached scanner among small groups of users, as well as increasing mobility and helping to reduce cable clutter.

The wireless connection also broadens connectivity possibilities by allowing the attached scanner to work not only in Windows and Mac environments, but also with Android devices using the free downloadable Canon CaptureOnTouch Mobile app. And on a full charge, the WU10 can deliver enough power to scan hundreds of images, further increasing mobility.

Customer Care

For investment protection, eCarePAK options are available to extend service beyond the initial one-year Advanced Exchange warranty period. This saves on costs associated with post-purchase maintenance and maximizes uptime throughout the product life.
