# Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

♦ **Compact Design**

This projector is designed compact in size and weight. It is easy to carry and installed anywhere you wish to use.

♦ **Simple Computer System Setting**

The projector has the Multi-scan system to conform to almost all computer output signals quickly (p.31). Up to WUXGA resolution can be accepted.

♦ **Useful Functions for Presentations**

- The digital zoom function allows you to focus on the crucial information during a presentation (pp.38,40)

- The MIC function and audio output allow you to make a presentation without any external audio equipment (p.27).

♦ **Lamp mode**

Brightness of the projection lamp can be selected (pp.28, 59).

♦ **Direct Power Off Function**

With the Direct Power Off function, you can disconnect the power cord from the wall outlet or turn off the breaker even during projection (p.23).

♦ **Logo Function**

The Logo function allows you to customize the screen logo (pp.53-55). You can capture an image for the screen logo and use it for the starting-up display or between presentations.

♦ **Multilanguage Menu Display**

Operation menu is available in 20 languages: English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Turkish, Kazakh, Vietnamese, Chinese, Korean, Japanese and Thai (p.51).

♦ **Security Function**

The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the top control or remote control unit (p.60). PIN code lock function prevents unauthorized use of the projector (pp.22, 60-61).

♦ **Helpful Maintenance Functions**

Lamp and filter maintenance functions provide for better and proper maintenance of the projector.

♦ **LAN Network Function**

This projector is loaded with the Wired LAN network function. You can operate and manage the projector via network. For details, refer to the user's manual of "Network Set-up and Operation."
(LAN Network function is only for LV-7292A, LV-7297A, LV-7392A, LV-8227A.)

♦ **Auto Setup Function**

This function enables Auto input, Auto Keystone correction and Auto PC adjustment by simple pressing the AUTO SET button on the top control (p.52).

♦ **Colorboard Function**

At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

♦ **Power Management Mode**

The Power management mode function reduces power consumption and maintains the lamp life (p.56).

♦ **Closed Caption**

This is a printed version of the program sound or other information displayed on the screen. You can turn on the feature and switch the channels. (p.58)

# Table of Contents

## Trademarks

Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.

# To the Owner

Before installing and operating this projector, read this manual thoroughly.

This projector provides many convenient features and functions.

Operating the projector properly enables you to manage those features and maintains it in good condition for many years to come. Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section on pages 70-72 of this manual. If the problem still persists, contact the dealer where you purchased the projector or the service center.

---

⚡ ⚠️ **CAUTION**

**RISK OF ELECTRIC SHOCK**
**DO NOT OPEN**

**CAUTION:**
**TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

⚡ **THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.**

⚠️ **THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE USER'S MANUAL WITH THIS UNIT.**

---

**CAUTION**
Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75.

---

**NOTE FOR CUSTOMERS IN THE US**
(Hg) LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS.

---

**READ AND KEEP THIS USER'S MANUAL FOR LATER USE.**

---

⚠️ **Safety Precaution**

**WARNING:**

- **THIS APPARATUS MUST BE EARTHED.**

- **TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

– This projector produces intense light from the projection lens. Do not stare directly into the lens, otherwise eye damage could result. Be especially careful that children do not stare directly into the beam.
– Install the projector in a proper position. Improper positioning may reduce the lamp life and result in severe accident or fire hazard.
– Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The dimension shown here indicate the minimum space required.
  If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.

SIDE and TOP          REAR

0.7'(20cm)

1.5'(50cm)    3'(1m)              3'(1m)
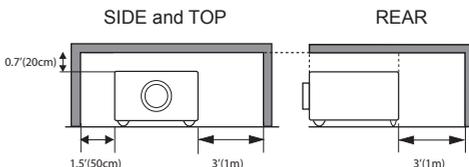

– Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.
– If the projector is unused for an extended time, unplug the projector from the power outlet.
– Do not project the same image for a long time. The afterimage may remain on the LCD panels by the characteristic of panel.

**DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.**

# Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.
Do not install the projector near the ventilation duct of air-conditioning equipment.
This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing Covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:
a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

# Safety Instructions

## ⚠ WARNING

Immediately turn the power off, unplug the projector, and contact your dealer under the following conditions, otherwise a fire or an electric shock may result.
– If smoke comes out from it.
– If it emits a strange odor, or makes a strange noise.
– If lamp goes out with a loud bang.
– If water or any other liquid gets into it.
– If metal or foreign objects get inside it.
– If it is knocked down or dropped and the cabinet is broken.

## ⚠ WARNING

Follow the instructions below when using the power cable, otherwise a fire, an electric shock, or injury may result.
– Do not place heavy objects on the power cord or position the power cord under the projector. Doing so may damage the power cord.
– Do not run the power cord under a carpet. As it goes unnoticed, excessive load may be applied on the cord unintentionally.
– Do not modify, bend forcibly, twist, or pull the power cord.
– Do not place the power cord near heat generating equipment or heat it.
– Do not bend, wind, or bind excessively the power cord when using it.
– Be sure to connect the projector to a grounded outlet. Failure to do so may result in an electric shock.
– Do not continue to use a damaged power cord. If the power cord is damaged, take it to your dealer and have it replace.
– Use only the supplied power cord.

## ⚠ WARNING

Follow the instructions below when handling the power plug or connector, otherwise a fire, an electric shock, or injury may result.
– Use the projector within the voltage range specified on the projector (AC 100 V– 240 V).
– Insert the power plug or connector into the power outlet firmly. Do not use a damaged or loosen power plug or connector.
– Be sure to hold the power cord plug or connector when disconnecting it from the power outlet. If the power cord itself is pulled, it may be damaged.
– Do not plug or unplug the power cord with wet hands.
– Disconnect the power cord from the power outlet before cleaning the projector.
– Do not stick metal objects into the electrical contacts of the power plug or connector.

– When an extension cord is necessary, be sure that the total current load of all equipment connected to the extension cord does not exceed the specified rating of the extension cord.
– Periodically unplug the power cord and remove the dust that builds up on the power cord or connector.

## ⚠ WARNING

Follow the instructions below to install or handle the projector. Otherwise, a fire, an electric shock, or injury may result.
– Do not touch the projector, power cord, or cables when lighting begins.
– Do not use the projector in a bathroom or shower room.
– Do not expose the projector to rain, snow, or use near water.
– Do not insert metal objects into the projector through the air vents.
– Do not place the containers with water on the projector.
– Do not install in the locations exposed to oily vapors or smoke (e.g., near a cooking table or humidifier).
– Before moving the projector, turn the power off and disconnect the power cord and all cables.
– Do not put spray cans in front of the exhaust vent. When spray cans are exposed to heat, the pressure in them will increase and explode.
– Do not open nor remove the cabinet. There are high voltage components inside the projector. Contact your dealer for inspection, adjustment, and service.
– Do not attempt to disassemble the projector (including expendable parts) or remote control unit.
– Do not look into the lens while the projector is used. Strong light may hurt your eyes. Be especially careful that small children do not look into the lens.

## ⚠ WARNING

Follow the instructions below when the lamp is replaced or breaks.
– Always unplug the power cord before replacing the lamp.
– When the lamp breaks, shards of glass may scatter in the lamp housing. Contact your dealer for cleaning or inspecting the projector, or replacing the lamp.

## ⚠ WARNING

Follow the instructions below when handling the batteries. Failure to do so may cause explosion, heat generation, a fire, or leakage of the battery fluid.
– Do not heat or disassemble the batteries, or throw them into fire.
– Do not attempt to recharge the batteries.

– Remove the batteries when they have been exhausted or not in use for an extended period of time.
– Be sure to replace both batteries at the same time. Do not mix batteries of different types.
– Insert batteries correctly according to the "+" and "-" markings.
– If a fluid from a battery leaks and comes in contact with your skin, rinse the affected skin thoroughly as soon as possible.

## ⚠ CAUTION

– Do not place heavy objects or step on the projector. Be especially careful that small children do not step on the projector. If not, the projector may drop or break, causing injury.
– Disconnect the power cord from the power outlet if the projector is left unused for a long period of time. Failure to do so may result in a fire.
– Do not bring your hands to the peripheral part of the exhaust vent on the cabinet. This area becomes hot during use. Be especially careful that small children do not touch the area. Failure to do so may result in burn.
– Do not put metal objects in front of or near the exhaust vent. They will become hot while projector is being used.
– Do not place the projector on top of unstable or slanted surfaces. The projector may fall down and cause injury.
– Do not attach the lens cover while the projector is being used or place any objects in front of the lens. Failure to do so may result in a fire.
– A buildup of dust inside the projector can cause a fire or damage. Consult your dealer for cleaning.
– When installing the projector to a ceiling, consult your electrician or dealer. If the projector is not fixed securely, accidents may result.

## ⚠ CAUTION

– Never take out the lamp soon after the projector is used. Let the projector cool for at least 1 hour before taking out the lamp, as burns may result.
– If the lamp replacement icon appears or the LAMP REPLACE indicator lights orange, immediately replace the lamp with a new one. Otherwise, the lamp may burst.
– If the lamp burns out, the gas or dust (containing mercury) inside the lamp may escape from the air vents. Immediately open the windows and ventilate the room. If you inhale the gas or the gas gets into your eyes or mouth, see a doctor at once.
– Dispose of a lamp containing mercury in the same manner as fluorescent lamps according to local regulations.

## Precaution During Use

– This projector is a precision machine. Do not subject the projector to strong shocks or vibrations or knock it down. Remove the lens, close the lens mounting hole with the front cover, and retract the adjustable foot before placing the projector into the carrying case. The projector may be damaged if you place it in the case without retracting the adjustable foot.
– Place the projector into the specified case when transporting it by courier or any other transportation service. Consult your dealer for the case.
– Keep space of 1 m or more at the sides of the projector between the intake/exhaust vents and walls. Poor ventilation may cause malfunction.
– Do not install the projector in the locations with heavy dust, high humidity, oily vapors, or cigarette smoke. A buildup of dust on the optical elements such as lens or mirror may degrade image quality.
– Directly touching the lens may cause poor image quality.
– If the projector is carried from a cold place to a warm place or the room temperature is raised rapidly, condensation may form on the lens and mirror due to the moisture in the atmosphere, resulting in a blurred picture. Wait until condensation evaporates and normal picture is shown.
– Do not install the projector in the locations with great difference in temperature. Doing so may cause malfunction. The ranges of the operating and storage temperatures are as shown below:
Operating temperature: 41°F–95°F [5°C–35°C]
Storage temperature: 10°F–140°F (-10°C–60°C)
– Do not install the projector near high-voltage electric power lines or power sources.
– Do not place the projector on a carpet or bed. The internal temperature will rise, causing malfunction.
– To avoid increase in the internal temperature, do not block the intake/exhaust vents.
– Position the projector at a proper angle. Incorrect positioning may cause troubles and accidents. Do not roll the projector more than 20 degrees from the horizontal.
– Do not place any heat-sensitive objects on the projector.

## Air Circulation

Openings in the cabinet are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered.

## ⚠ CAUTION

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.

– Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.
– Keep the exhaust vent at least 3' (1 m) away from any objects.
– Do not touch a peripheral part of the exhaust vent, especially screws and metallic parts. These areas will become hot while the projector is being used.
– Do not put anything on the cabinet. Objects put on the cabinet will not only get damaged but also may cause fire hazard by heat.
– Make sure that there is no object under the projector to prevent from covering the bottom openings.

Cooling fans are provided to cool down the projector. The fans' running speed is changed according to the temperature inside the projector.

Air Intake Vent (Filter)

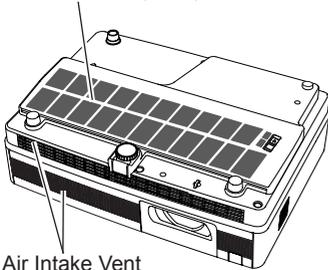

Air Intake Vent

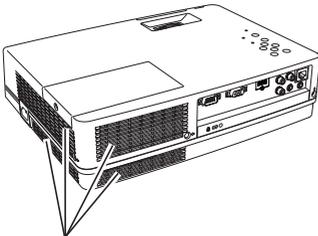

Exhaust Vent
(Hot air exhaust)

## Installing the Projector in Proper Position

Install the projector properly. Improper installation may reduce the lamp life and cause a fire hazard.
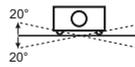

Do not roll the projector more than 20 degrees from side to side.
Do not pitch the projector more than 30 degrees from above and below.

Do not point the projector up to project an image.

Do not point the projector down to project an image.

Do not put the projector on either side to project an image.

## Moving the Projector

When moving the projector, retract the adjustable foot to prevent damage to the cabinet and use a suitable carrying case.
When this projector is not in use for an extended period, put it into a suitable case to protect the projector.

### ⚠ CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

– Do not drop or bump the projector, otherwise damages or malfunctions may result.
– When carrying the projector, use a suitable carrying case.
– Do not transport the projector by courier or any other transport service in an unsuitable transport case. This may cause damage to the projector. For information about transporting the projector by courier or any other transport service, consult your dealer.
– Do not put the projector in a case before the projector is cooled enough.

# Compliance

**Federal Communications Commission Notice**

Multimedia Projector, Model: LV-7292A, LV-7297A, LV-7392A, LV-8227A, LV-7292M, LV-7297M, LV-8227M

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  (1) This device may not cause harmful interference, and
  (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  – Reorient or relocate the receiving antenna.
  – Increase the separation between the equipment and receiver.
  – Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  – Consult the dealer or an experienced radio/TV technician for help.
Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.
Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.
Canon U.S.A., Inc.
One Canon Plaza, Lake Success, NY 11042-1198, U.S.A.
Tel No. (516)328-5600

**Canadian Radio Interference Regulations**

This Class B digital apparatus complies with Canadian ICES-003.

**AC POWER CORD REQUIREMENT**

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

**AC Power Cord for the United States and Canada:**

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

GROUND

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

## European Union (and EEA) only.

These symbols indicate that this product is not to be disposed of with your household waste, according to the WEEE Directive (2002/96/EC), the Battery Directive (2006/66/EC) and/or your national laws implementing those Directives.

If a chemical symbol is printed beneath the symbol shown above, in accordance with the Battery Directive, this indicates that a heavy metal (Hg = Mercury, Cd = Cadmium, Pb = Lead) is present in this battery or accumulator at a concentration above an applicable threshold specified in the Battery Directive.

This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE) and batteries and accumulators. Improper handling of this type of waste could have a possible impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE.
Your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources.
For more information about the recycling of this product, please contact your local city office, waste authority, approved scheme or your household waste disposal service or visit www.canon-europe.com/environment.

# Part Names and Functions

## Top Control

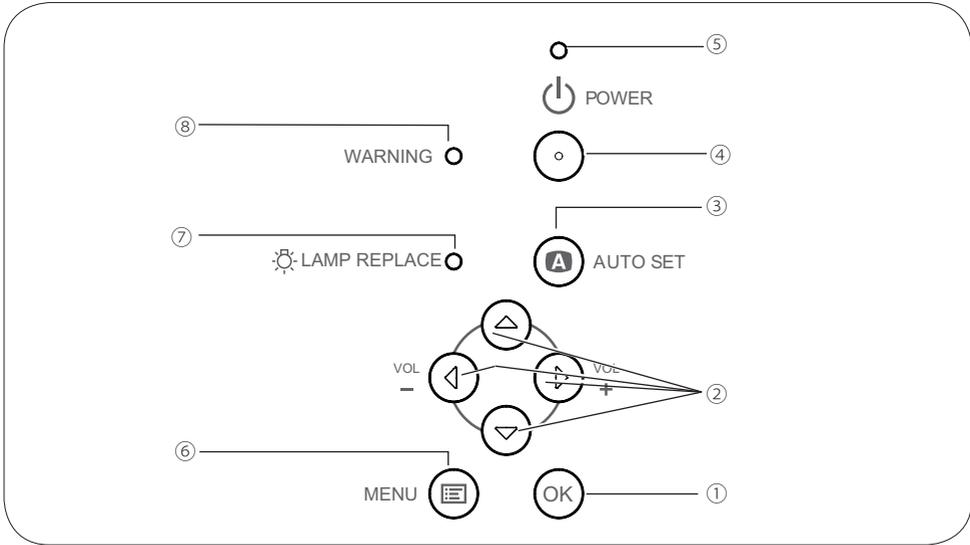

① **OK button**
  – Execute the selected item (p.24).
  – Zoom in or out the image in the Digital zoom mode (pp.38, 40).

② **POINT ▲▼◄► (VOLUME –/+) buttons**
  – Select an item or adjust the value in the On-Screen Menu (p.24).
  – Pan the image in the Digital zoom +/- mode (pp.38, 40).
  – Adjust the volume level (Point ◄►buttons) (p.27).

③ **AUTO SET button**
  Execute the setting of Auto setup (includes Auto input, Auto PC and Auto Keystone functions) in the setting menu (pp.26, 52).

④ **POWER button**
  Turn the projector on or off (pp.21-23).

⑤ **POWER indicator**
  – Lights red when the projector is in stand-by mode.
  – Lights green during operations.
  – Blinks green in the Power management mode (p.56).

⑥ **MENU button**
  Open or close the On-Screen Menu (p.24).

⑦ **LAMP REPLACE indicator**
  Lights yellow when the projection lamp reaches its end of life (pp.68, 75).

⑧ **WARNING indicator**
  – Lights red when the projector detects an abnormal condition.
  – Blinks red when the internal temperature of the projector exceeds the operating range (pp.65, 75).

## Remote Control Unit

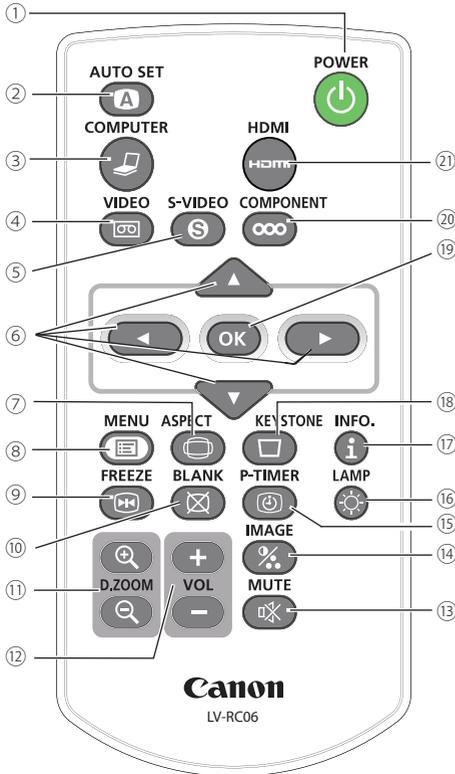

① **POWER button**
  Turn the projector on or off. (pp.21-23)

② **AUTO SET button**
  Execute the setting of Auto setup (includes Auto input, Auto PC and Auto Keystone functions) in the setting menu. (pp.26, 52)

③ **COMPUTER button**
  Select the COMPUTER input source. (pp.30, 42)

✓**Note:**
  To ensure safe operation, please observe the following precautions:
  – Do not bend, drop or expose the remote control unit to moisture or heat.
  – For cleaning, use a soft dry cloth. Do not apply benzene, thinner, spray, or any chemical material.

④ **VIDEO button**
  Select the VIDEO input source. (p.41)

⑤ **S-VIDEO button**
  Select the S-VIDEO input source. (p.41)

⑥ **Point ▲ ▼ ◄ ► buttons**
  – Select an item or adjust the value in the On-Screen Menu. (p.24)
  – Pan the image in the Digital zoom +/- mode. (pp.38, 40)

⑦ **ASPECT button**
  Select a screen mode. (pp.29,37-40,47-50)

⑧ **MENU button**
  Open or close the On-Screen Menu. (p.24)

⑨ **FREEZE button**
  Freeze the picture on the screen. (p.28)

⑩ **BLANK button**
  Temporarily turn off the image on the screen. (p.29)

⑪ **D.ZOOM +/- buttons**
  Zoom in and out the images. (pp.28, 38, 40)

⑫ **VOLUME +/- buttons**
  Adjust the volume level. (p.27)

⑬ **MUTE button**
  Mute the sound. (p.27)

⑭ **IMAGE button**
  Select the image mode. (pp.29, 35, 44)

⑮ **P-TIMER button**
  Operate the P-timer function. (pp.29, 57)

⑯ **LAMP button**
  Select a lamp mode. (pp.28, 59)

⑰ **INFO. button**
  Operate the information function. (p.64)

⑱ **KEYSTONE button**
  Correct keystone distortion. (p.26)

⑲ **OK button**
  – Execute the selected item. (p.24)
  – Zoom in or out the image in Digital zoom mode. (pp.38, 40)

⑳ **COMPONENT button**
  Select the COMPONENT input source. (p.42)

㉑ **HDMI button**
  Select the HDMI input source. (p.42)

## Remote Control Unit Battery Installation

**1** Open the battery compartment lid.

**2** Install new batteries into the compartment.

**3** Replace the compartment lid.
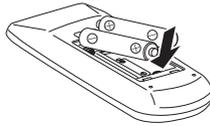

**Two AAA size batteries**
For correct polarity (+ and –), be sure battery terminals are in contact with pins in compartment.
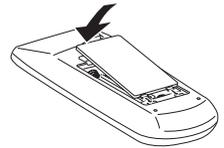

### ⚠ WARNING

To ensure safe operation, please observe the following precautions :
- Use two (2) AAA type batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control unit to moisture or heat.
- Do not drop the remote control unit.
- If the battery has leaked on the remote control unit, carefully wipe the case clean and install new batteries.
- Risk of an explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions or your local disposal rule or guidelines.

## Remote Control Unit Operating Range

Point the remote control unit toward the projector (Infrared Remote Receiver) when pressing the buttons. Maximum operating range for the remote control unit is about 16.4'(5 m) and 60 degrees in front of the projector.

16.4'
(5 m)

30°

30° Remote control unit
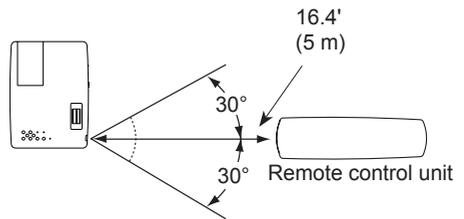

## Remote Control Code

The 2 different remote control codes (Code 1–Code 2) are assigned to this projector. Switching the remote control codes prevents interference from other remote control units when several projectors or video equipment next to each other are operated at the same time. Change the remote control code for the projector first before changing that for the remote control unit. See "Remote control" in the Setting Menu on page 59.

Press and hold the MENU and IMAGE buttons for more than five seconds to switch between the **Code 1** and **Code 2**. The initial code is set to **Code 1**.

**MENU button**

# Installation

## Positioning the Projector

For projector positioning, see the figures below. The projector should be set perpendicularly to the plane of the screen.

✓**Note:**

• The brightness in the room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.
• All measurements are approximate and may vary from the actual sizes.

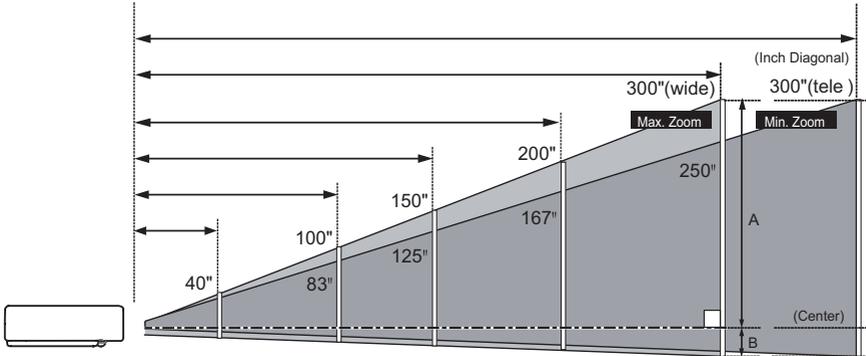

### For LV-7292A, LV-7297A, LV-7292M, LV-7297M

A:B = 6:1

| Screen Size (W x H) mm 4:3 aspect ratio | 40" | 100" | 150" | 200" | 300" |
|---|---|---|---|---|---|
| | 813 x 610 | 2032 x 1524 | 3048 x 2286 | 4064 x 3048 | 6096 x 4572 |
| Zoom (max) | 4.3'(1.30m) | 10.7'(3.26m) | 16.1'(4.90m) | 21.5'(6.55m) | 32.3'(9.84m) |
| Zoom (min) | 5.1'(1.55m) | 12.9'(3.92m) | 19.4'(5.90m) | 25.8'(7.87m) | 38.7'(11.80m) |

### For LV-7392A

A:B = 6:1

| Screen Size (W x H) mm 4:3 aspect ratio | 40" | 100" | 150" | 200" | 300" |
|---|---|---|---|---|---|
| | 813 x 610 | 2032 x 1524 | 3048 x 2286 | 4064 x 3048 | 6096 x 4572 |
| Zoom (max) | 3.6'(1.1m) | 9.5'(2.9m) | 14.3'(4.4m) | 19.1'(5.8m) | 28.6'(8.7m) |
| Zoom (min) | 4.5'(1.4m) | 11.4'(3.5m) | 17.1'(5.2m) | 22.9'(7.0m) | 34.4'(10.5m) |

### For LV-8227A, LV-8227M

A:B = 13:1

| Screen Size (W x H) mm 16:10 aspect ratio | 40" | 100" | 150" | 200" | 300" |
|---|---|---|---|---|---|
| | 862 x 538 | 2154 x 1346 | 3231 x 2019 | 4308 x 2692 | 6462 x 4039 |
| Zoom (max) | 4.0'(1.2m) | 10.1'(3.1m) | 15.1'(4.6m) | 20.2'(6.2m) | 30.3'(9.3m) |
| Zoom (min) | 4.8'(1.5m) | 12.1'(3.7m) | 18.2'(5.5m) | 24.3'(7.4m) | 36.4'(11.1m) |

## Project vertically to the screen

Adjust the light axis vertically to the screen.

✓**Note:**
   If the projector is too oblique to the screen, part of the
   focus may be deviated.

90°

Light axis

Screen
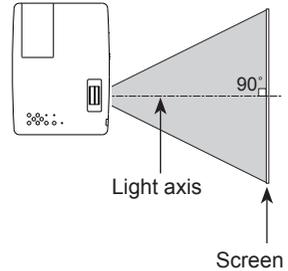

## Adjust the Height and the Incline angle of the projected image

Projection angle can be adjusted up to 10.0 degrees with the adjustable foot.

Lift the front of the projector and push the foot lock latch on the projector.

Release the foot lock latch to lock the adjustable foot and rotate the adjustable foot to adjust the position and tilt.

To retract the adjustable foot, lift the front of the projector and push and undo the foot lock latch.

Foot Lock Latch          Adjustable Foot

✓**Note:**
   Retract the adjustable foot when transporting the projector.
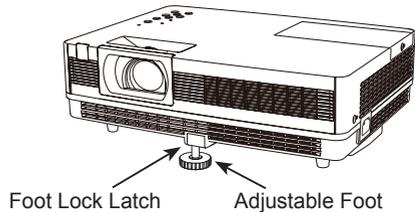

● **Tilt the projector within ±20 degrees horizontally**

When moving the projector horizontally, make suer to tilt the projector within ±20 degrees, otherwise it may result in lamp malfunction.

● **About the Keystone distortion adjust**

The projection image will become distorted if the adjustable foot is lifted too high or the project angle is too oblique to the screen. In these conditions, adjust the height of the support desk of the projector.

✓**Note:**
   Keystone distortion of the projected image can be corrected by menu operation. (pp 26, 38, 40, 48, 50)

● **About the brightness of the room**

Do not expose the screen directly to the sunlight or lamp light, because this will make the screen too white to see the projection image clearly. When using the projector in a sufficient brightness room, slightly lower the brightness of the room.

## Connecting to a Computer

**Cables used for connection**
• VGA Cables (Mini D-sub 15 pin) *(Only one cable is supplied.)
• Audio Cables
• HDMI-DVI Cable
(*One cable is supplied; other cables are not supplied with the projector.)

✓**Note:**
 Unplug the power cords of both the projector and external equipment
 from the AC outlet before connecting cables.

## Using the ferrite core

Before using the AC Power Cord, attach the ferrite core (supplied) as shown below. (See below for mounting location.)
The Power Cord with ferrite core must be used for RF interference suppression.

0.39" (10 mm)

Ferrite Core

AC Power Cord

Keep closing until it makes a clicking sound.

## Connecting the AC Power Cord

This projector uses nominal input voltages of 100-240 V AC and it automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system.
If you are not sure of the type of power being supplied, consult your authorized dealer or service center.
Connect the projector with all peripheral equipment before turning the projector on.

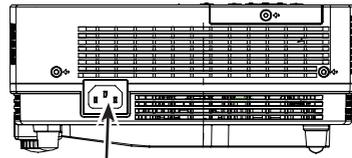

Connect the AC power cord (supplied) to the projector.

**CAUTION**

The AC outlet must be near this equipment and must be easily accessible.

✓**Note**:

Unplug the AC power cord when the projector is not in use. When this projector is connected to an outlet with the AC power cord, it is in Stand-by mode and consumes a little electric power.

---

**NOTE ON THE POWER CORD**
AC power cord must meet requirement of the country where you use the projector.
Confirm the AC plug type with the chart below and proper AC power cord must be used.
If supplied AC power cord does not match your AC outlet, contact your sales dealer.

| Projector side | AC outlet side | | |
|---|---|---|---|
| | **For the U.S.A. and Canada** | **For Continental Europe** | **For the U.K.**    Ground |

# Basic Operation

## Turning On the Projector

**1** Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

**2** Connect the projector's AC power cord into an AC outlet. The POWER indicator lights red. Open the lens cap.

**3** Press the POWER button on the top control or on the remote control unit. The POWER indicator lights green and the cooling fans start to operate. The preparation display appears on the screen and the countdown starts.

**4** After the countdown, the input source that was selected the last time and the Lamp mode status icon (p. 59) appear on the screen for about 4 seconds.

**5** If there is no signal input when start on the projector, or the current signal is missed while operating the projector, the VIDEO/PC selection window will be displayed on the screen, please move the pointer to input source desired by pressing the Point ▲▼ buttons and press the OK button. And then follow the input signal guidance window to correct the signal and connection.

If the projector is locked with a PIN code, PIN code input dialog box will appear. Enter the PIN code as instructed on the next page.

16

**Canon**
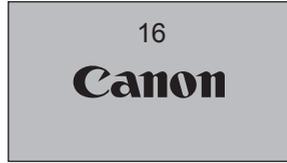

The preparation display will disappear after 30 seconds.

✓**Note:**
- When the Logo select function is set to **Off**, the logo will not be shown on the screen (p.53).
- When **Countdown off** or **Off** is selected in the Display function, the preparation display will not be shown on the screen (p.53).
- When the Auto input function is set to **On 2**, the input signal will be searched automatically (p.52).
- When **Off** is selected in the Display function, the VIDEO/PC selection window and the input signal guidance window are not shown on the screen (p.53).

### Enter a PIN code

Use the Point ▲▼ buttons to enter a number. Press the Point ► button to fix the number and move the red frame pointer to the next box. The number changes to ✳. If you fixed an incorrect number, use the Point ◄ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set". Press the OK button so that you can start to operate the projector.

If you entered an incorrect PIN code, **PIN code** and the number (✳ ✳ ✳ ✳) will turn red for a moment. Enter the correct PIN code all over again.

### What is PIN code?

PIN (Personal Identification Number) code is a security code that allows the person who knows it to operate the projector. Setting a PIN code prevents unauthorized use of the projector.

A PIN code consists of a four-digit number. Refer to the PIN code lock function in the Setting Menu on pages 60-61 for locking operation of the projector with your PIN code.

**PIN Code Input Dialog Box**

After the OK icon disappears, you can operate the projector.

✓**Note:**
•If the PIN code number is not entered or wrong PIN code number is entered within three minutes after the PIN code dialog box appeared, the projector will be turned off automatically.
•The "1234" is set as the initial PIN code at the factory.

**CAUTION ON HANDLING PIN CODE**
If you forget your PIN code, the projector can no longer be started. Take special care in setting a new PIN code. Write down the number as a reminder. Should the PIN code be missing or forgotten, consult your dealer or service center.

### About the Power Management mode

This projector has the Power Management mode function. When there is no signal input for more than 30 seconds and also there is no operation to the projector, the **No signal** image appears and the countdown begins. After the countdown, the lamp will be off. This function helps to save power consumption and extend the lamp life. (p. 56)

Remaining Time until the lamp is off.

#### When set to Standby

The cooling starts when the countdown is finished and the lamp is off. During the cooling, the POWER indicator blinks red, and do not do any operation to the projector.
The POWER indicator blinks green when the cooling is completed and it goes to the Power Management mode. In this condition, the projection lamp will be turned on and image will be projected if the input signal is reconnected or any button on the top control or remote control unit is pressed.

#### When set to Exit

The cooling starts when the countdown is finished and the lamp is off. During the cooling, the POWER indicator blinks red, and do not do any operation to the projector.
The power will be turned off and the projector goes to Standby mode when the cooling is completed.

## Turning Off the Projector

**1** Press the POWER button on the top control or on the remote control unit, and **Power off?** appears on the screen.

**2** Press the POWER button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep running. (You can select the level of fans' quietness and speed. See "Fan" on page 62.) At this time, you can unplug the AC power cord even if the fans are still running.

**3** When the projector has cooled down enough, the POWER indicator stops blinking and you can turn on the projector.

### CAUTION

**TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST FIVE MINUTES BEFORE TURNING IT OFF.**

### CAUTION

**DO NOT OPERATE THE PROJECTOR CONTINUOUSLY WITHOUT REST. CONTINUOUS USE MAY RESULT IN SHORTENING THE LAMP LIFE. TURN OFF THE PROJECTOR AND LET STAND FOR ABOUT AN HOUR IN EVERY 24 HOURS.**

✓**Note:**
 • When the Direct power on function is set to **On**, the projector will be turned on automatically by connecting the AC power cord to an AC outlet (p.56).
 • The running speed of cooling fans is changed according to the temperature inside the projector.
 • Do not put the projector in a case before the projector is cooled enough.
 • If the WARNING indicator blinks or lights red, see "WARNING indicator" on page 65.
 • While the POWER indicator is blinking, the lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator stops blinking to turn on the projector again.
 • The fan rotation will terminate directly if the AC power cord is unplugged immediately after the projector is turned off.
 • The projector can be turned on after the POWER indicator turns red. The waiting time to restart will be shortened when the normal power-off processing for fan cooling is completed, compared with the time the AC power cord is immediately unplugged after the power-off.

```
Power off ?
```

**Power off?** disappears after 4 seconds.

### Direct Power Off Function

You can disconnect the power cord from the wall outlet or turn off the breaker even during projection without pressing the POWER button.

✓**Note:**
 When using the Direct Power Off function, you can not restart the projector immediately after the power is disconnected. If the external power supply is suddenly cut off, the fans stop immediately. The lamp remains high temperature and needs to be cooled.
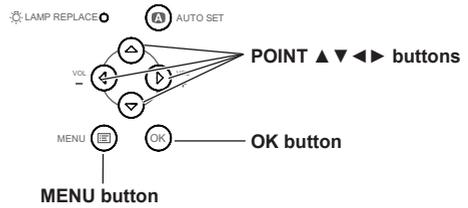

# Basic Operation

## How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. The menus have a hierarchical structure, with a main menu that is divided into submenus, which are further divided into other submenus. For each adjustment and setting procedure, refer to respective sections in this manual.

**1** Press the MENU button on the top control or the remote control unit to display the On-Screen Menu.

**2** Use the Point ▲▼ buttons to highlight or select a main menu item. Press the Point ► or the OK button to access the submenu items. (The selected item is highlighted in orange.)

**3** Use the Point ▲▼ buttons to select the desired submenu item and press the OK button to set or access the selected item.

**4** Use the Point ▲▼◄► buttons to adjust the setting or switch between each option and press the OK button to activate it and return to the submenu.

**5** Press the Point ◄ button to return to the main menu. Press the MENU button to exit the On-Screen Menu.

# Basic Operation

## Zoom and Focus Adjustment

Rotate the Zoom Ring to zoom in and out.
Rotate the Focus Ring to adjust the focus of the image.

Zoom Ring

Focus Ring
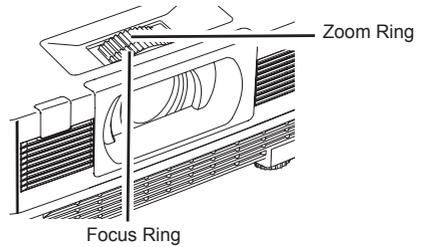

## Auto Setup Function

Auto setup function is provided to automatically execute the setting of Auto setup (includes Auto input, Auto PC and Auto Keystone functions) in the setting menu by just pressing the AUTO SET button on the top control or the remote control unit. Refer to page 52 for the setting of the Auto setup function.

✓**Note:**
- Auto Keystone corrects vertical distortion only; it does not correct horizontal distortion.
- Auto Keystone cannot work when Ceiling feature is set to **On** in the Setting menu (pp.38, 40, 48, 50).
- Perfect correction of the image distortion cannot be ensured with the Auto setup function. If the distortion cannot be corrected properly by pressing the AUTO SET button, adjust manually by pressing the KEYSTONE button on the remote control unit or selecting Keystone in the Aspect menu (pp.38, 40, 48, 50).
- **Fine sync**, **Total dots**, **Horizontal position** and **Vertical position** position of some computers cannot be fully adjusted with the Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.33-34).
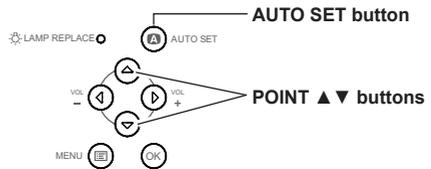

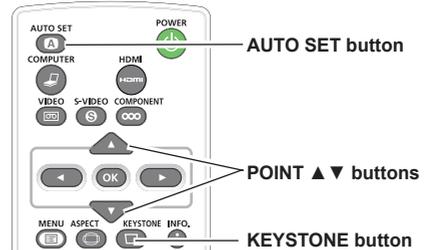

## Keystone Correction

If a projected picture still has keystone distortion after pressing the AUTO SET button on the top control or the remote control unit, correct the image manually as follows:

Press the KEYSTONE button on the remote control unit. The Keystone dialog box appears. Use the Point ▲ ▼ buttons to correct keystone distortion. The keystone adjustment can be stored (pp.38, 40, 48, 50).

Reduce the upper width with the Point ▲ button.

Reduce the lower width with the Point ▼ button.

## Sound Adjustment

### Direct Operation

#### Volume

Press the VOLUME+/– buttons on the top control or on the remote control unit to adjust the volume. The volume dialog box appears on the screen for a few seconds.

#### Mute

Press the MUTE button on the remote control unit to select **On** to temporarily turn off the sound. To turn the sound back on, press the MUTE button again to select **Off** or press the VOLUME +/– buttons. The Mute function is also effective for the AUDIO OUT jack.

### Menu Operation

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲ ▼ buttons to select **Sound**. Press the Point ► or the OK button to access the submenu items.

**2** Use the Point ▲ ▼ buttons to select the desired submenu item and press the OK button to access the selected item.

#### Volume

Press the Point ► button to turn up the volume; Press the Point ◄ button to turn down the volume.

#### Mute

Press the OK button to switch the mute function **On/Off**. When the sound is turned off, **On** is displayed. Press the VOLUME +/– buttons again or adjust MIC gain's volume to turn the sound back on.

#### MIC

Use the Point ▲ ▼ buttons to switch the MIC function **On**/**Off,** and then press the OK button. When **On** is selected, the synthesis volume (MIC and RCA) is output.
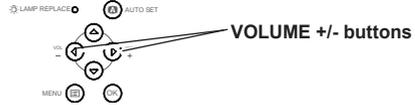

#### MIC GAIN

Press the Point ► button to turn up the MIC mixing gain; Press the Point ◄ button to turn down the MIC mixing gain.
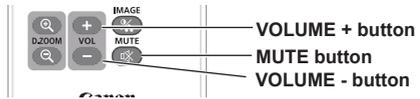

#### STANDBY MIC OUT

When setting the STANDBY MIC OUT function to **On** and in Standby mode status, only MIC input volume can be output.

#### Top Control

✓**Note:**
 • When **Off** is selected in MIC function, the MIC GAIN and STANDBY MIC OUT functions are not available.
 • Only the Standby mode is set to **Network**, **STANDBY MIC OUT** can be selected.
 • If the MIC function is turned on when connecting PC audio to the AUDIO IN (a mini jack), loud sound may be output suddenly depending on the setting value of MIC GAIN.
 • Press the Point ◄► buttons on the top control or on the remote control unit to adjust the MIC input volume.

# Basic Operation

## Remote control unit Operation

Using the remote control unit for some frequently used operations is advisable. Just pressing one of the buttons enables you to make the desired operation quickly without calling up the On-Screen Menu.

**COMPUTER, HDMI, VIDEO, S-VIDEO and COMPONENT buttons**

Press the COMPUTER, HDMI, VIDEO, S-VIDEO and COMPONENT buttons on the remote control unit to select the input source. See pages 30, 41-42 for details.

**FREEZE button**

Press the FREEZE button on the remote control unit to freeze the picture on the screen, meanwhile, volume is muted. To cancel the Freeze function, press the FREEZE button again or press any other button.
Fig.1 will appear on the screen while the Freeze function is working.

Fig.1

**INFO. button**

Display the input source information: **Input**, **H-sync freq.**, **V-sync freq.**, **Aspect**, **Language**, **Lamp status**, **Lamp counter**, **Power management mode**, **Key lock**, **PIN code lock, Remote control** and **SERIAL NO.** (p.64)

**D.ZOOM buttons**

Press the D.ZOOM buttons on the remote control unit to enter to the Digital zoom +/– mode. See pages 38,40 for details.

**LAMP button**

Press the LAMP button on the remote control unit to select the lamp mode for changing the brightness on the screen.

- High........... Brighter than the Normal mode.
- Normal ...... Normal brightness
- Eco............ Lower brightness reduces the lamp power consumption and extends the lamp life.

# Computer Input

## Input Source Selection (ANALOG PC: COMPUTER)

### Direct Operation

Choose **COMPUTER (ANALOG PC)** by pressing the COMPUTER button on the remote control unit.
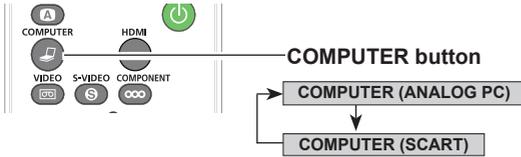

**Remote control unit**

**COMPUTER button**

COMPUTER (ANALOG PC)

COMPUTER (SCART)

### Menu Operation

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select **COMPUTER** and then press the OK button.

**3** When **COMPUTER** is selected, press the Point ► button to access the submenu items. Use the Point ▲▼ buttons to select the **ANALOG PC** input source and then press the OK button.

**Input Menu**

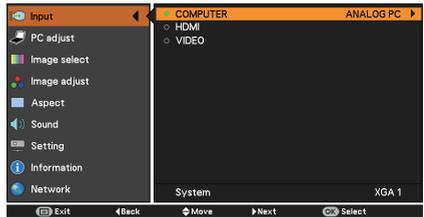

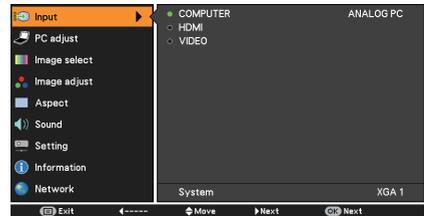

COMPUTER

✓**Note:**
When the Auto input function is set to **On 1** or **On 2** in the Auto setup function, the input signal will be searched automatically (p.52).

## Computer System Selection

This projector automatically tunes to various types of computers with its Multi-scan system and Auto PC Adjustment. If a computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional settings. (Signal formats provided in this projector are shown on pages 76-77.)

One of the following messages may appear when:

**Auto** — When the projector cannot recognize the connected signal conforming to the provided PC systems, **Auto** is displayed on the System Menu box and the Auto PC Adjustment function works to display proper images. If the image is not projected properly, a manual adjustment is required (pp. 33-34).

**- - - -** — There is no signal input from the computer. Check the connection between your computer and the projector. (See "Troubleshooting" on p. 71.)

**Mode 1** — The preset system is manually adjusted in the PC adjust Menu. The adjusted data can be stored in **Mode 1-10** (pp. 33-34).

**SVGA 1** — PC Systems provided in this projector is chosen. The projector chooses a proper system provided in the projector and displays it.

\***Mode 1** and **SVGA 1** are examples.

**PC System Menu**

Selected system in the PC System Menu is displayed.

### Selecting Computer System Manually

PC system can also be selected manually.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select **System** and then press the Point ► or the OK button.

**3** Use the Point ▲▼ buttons to select the desired system and then press the OK button.

Customized **Mode (1–10)** set in the PC adjust Menu (pp. 33-34).

**PC System Menu**

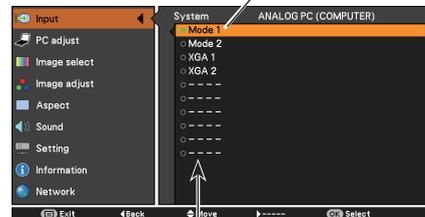

Systems in this dialog box can be selected.

# Computer Input

## Auto PC Adjustment

When the image is not stable or flicker, or when the image is not in right position as inputing ANALOG PC signal, press the AUTO SET button on the remote control unit to adjust the **Fine sync**, **Total dots**, **Horizontal position** and **Vertical position** to obtain best display.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **PC adjust** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select **Auto PC** and then press the OK button.

✓**Note:**
- The adjusted parameters from the Auto PC Adjustment can be stored in the projector. Once the parameters are stored, the setting can be done just by selecting a Mode (1–10) in the PC System Menu (p.31). See also "Store" on page 34.
- The Auto PC Adjustment cannot be operated when **480i**, **575i**, **480p**, **575p**, **720p**, **1035i** or **1080i** is selected in the PC System Menu (p. 31), or when the signal is coming from the HDMI terminal.

## When the image is not provided properly with Auto PC adjustemnt

When the image is not provided properly with Auto PC, operate as bellows:

- Use **Input** menu to adjust the System mode to match to the computer resolution. Refer to page 31 for details.
  See operation example below.

- Use **PC adjust** menu to adjust the System mode manually and store the adjusted parameters in the Custom Mode. See page 34.
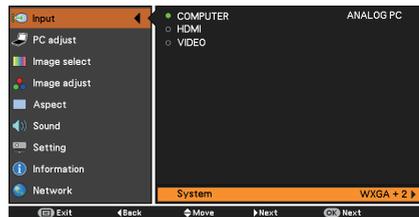

**Operation Example**
Resolution :1600 x 1200, Vertical Frequency: 60 Hz

**1** Press the MENU button to display the On-Screen Menu. Press the Point ▲▼ buttons to select **Input**.

**2** Press the Point ► button to access to **COMPUTER** and then press the OK button.

**3** Confirm the System mode displayed. If the input signal is different from the computer signal, operate the following steps.

**4** Use the Point ▲▼ buttons to select **System** and and press the OK button or the Point ► button.

**5** Use the Point ▲▼ buttons to select the input computer signal and press the OK button.

**6** Press the MENU button to exit the On-Screen Menu and confirm the image.

✓**Note:**
- Refer to page 76 for the Compatible Computer Specifications.
- Some signal formats may not be able to display correctly.
- Only when input computer signal to the projector, **PC adjust** will become available.

## Manual PC Adjustment

Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC Adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has 10 independent memory areas to store those parameters manually adjusted. It allows you to recall the setting for a specific computer.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **PC adjust** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select the desired item and then press the OK button to display the adjustment dialog box. Use the Point ◄► buttons to adjust the setting value.

**PC adjust Menu**

**Fine sync**

Use the Point ◄► buttons to adjust the value, eliminating a flicker from the image displayed (from 0 to 31).

**Total dots**

Use the Point ◄► buttons to adjust the number of total dots in one horizontal period to match your PC image.

**Horizontal position**

Use the Point ◄► buttons to adjust the horizontal picture position.

**Vertical position**

Use the Point ◄► buttons to adjust the vertical picture position.
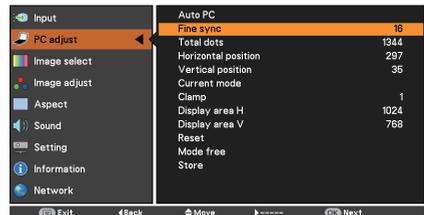

**Current mode**

Press the OK button to show **H-sync freq.** and **V-sync freq.** of the connected computer.

**Clamp**

Use the Point ◄► buttons to adjust the clamp level. When the image has dark bars, try this adjustment.

**Display area H**

Use the Point ◄► buttons to adjust the horizontal area displayed by this projector.

**Display area V**

Use the Point ◄► buttons to adjust the vertical area displayed by this projector.

✓**Note:**
   • **Display area (H/V)** cannot be selected when **480i**, **575i**, **480p**, **575p**, **720p**, **1035i** or **1080i** is selected in the PC System Menu (p.31).

# Computer Input

### Reset

To reset the adjusted data, select **Reset** and press the OK button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

### Mode free

To clear the stored data, select **Mode free** and then press the Point ► or the OK button. Move the highlight to the Mode that you want to clear and then press the OK button.

### Store

To store the adjusted data, select **Store** and then press the Point ► or the OK button. Move the highlight to one of the Modes 1 to 10 in which you want to store, and then press the OK button.

**Mode free**
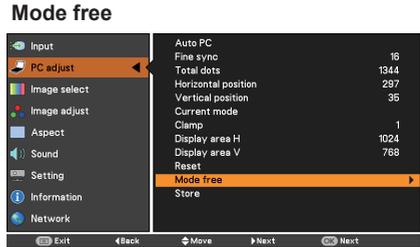

This Mode has stored parameters.
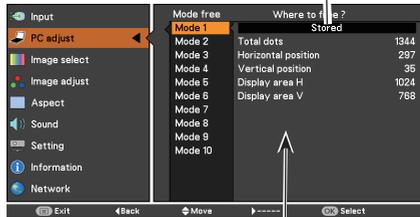

Values of **Total dots**, **Horizontal position**, **Vertical position**, **Display area H**, and **Display area V**.

Vacant
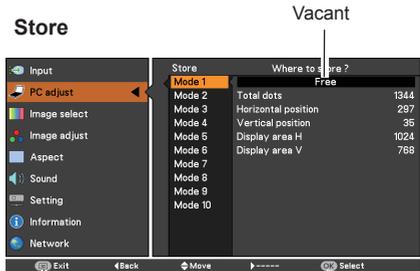

**Store**

Press MENU button to close this dialog box.

Press OK button to store the data.

## Image Mode Selection

### Direct Operation

Select the desired image mode among **Presentation**, **Standard**, **High contrast**, **Cinema**, **Blackboard (Green)**, **Colorboard**, **User 1**, **User 2**, **User 3** and **User 4** by pressing the IMAGE button on the remote control unit.

**IMAGE button**

### Menu Operation

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Image select** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select the desired item and then press the OK button.

**Presentation**

For viewing pictures in a bright room.

**Standard**

Normal picture mode preset on the projector.

**High contrast**

Picture mode with improved halftone for graphics.

**Cinema**

Picture mode adjusted with fine tone.

**Blackboard (Green)**

For the image projected on a blackboard. This mode helps enhance the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

**Colorboard**

At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

Use the Point ▲▼ buttons to select **Colorboard** and then press the Point ► or the OK button to access the submenu. Press the Point ▲▼ buttons to select items among Red, Blue, Yellow and Green.

**User 1-4**

For viewing with the user preset image mode in the Image Adjust Menu (see page 36).

**Image select Menu**
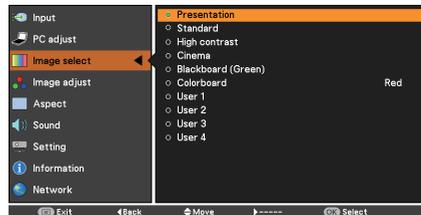

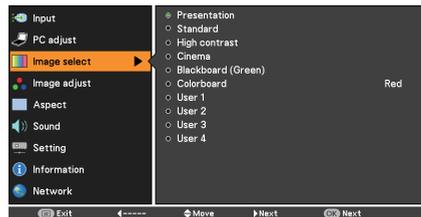

# Computer Input

## Image Adjustment

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Image adjust** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select the desired item and then press the OK button to display the adjustment dialog box. Use the Point ◄► buttons to adjust the setting value.

### Contrast

Press the Point ◄ button to decrease the contrast; press the Point ►button to increase the contrast (from 0 to 63).

### Brightness

Press the Point ◄ button to decrease the brightness; press the Point ►button to increase the brightness (from 0 to 63).

### Auto iris*

Press the Point ◄► buttons to select **Off** or **On**.
  **Off** ...... Disabled.
  **On** ...... The iris function is activated.
\* Auto iris is only for LV-7292A, LV-7297A, LV-7392A, LV-8227A.

### Color temp.

Use the Point ◄► buttons to select the desired Color temp. level (**XLow**, **Low**, **Mid**, or **High**).

### White balance (Red / Green / Blue)

Press the Point ◄ button to lighten R/G/B tone; press the Point ► button to deepen R/G/B tone (from 0 to 63).

### Sharpness

Press the Point ◄ button to decrease the sharpness of the image; press the Point ► button to increase the sharpness of the image (from 0 to 15).

### Gamma

Use the Point ◄► buttons to adjust the gamma value to obtain a better balance of contrast (from 0 to 15).

### Reset

To reset the adjusted data, select **Reset** and press the OK button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

### Store

To store the adjusted data, select **Store** and press the Point ► or the OK button. Use the Point ▲▼ buttons to select one from **User 1** to **User 4** and press the OK button. A confirmation box appears and then select **Yes**. Stored data can be called up by selecting an **User (1-4)** in the Image Mode Selection on page 35.

### Image Adjust Menu
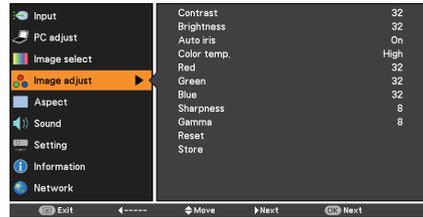

Selected Image mode
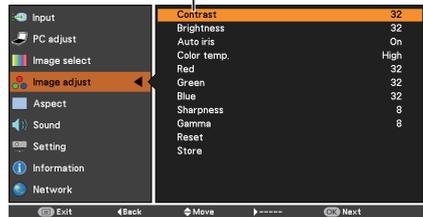

Use the Point ◄► buttons to adjust the setting value.

### Store

A confirmation box appears and then select **Yes**.

✓**Note:**
• When White balance **Red**, **Green** or **Blue** is adjusted, **Color temp.** will change to **User**.
• When **Blackboard(Green)** or **Colorboard** is selected in Image select, **Color temp.** will change to **Blackboard** or **Colorboard**.

## Aspect Setting (For LV-7292A, LV-7297A, LV-7392A, LV-7292M, LV-7297M)

This projector has the picture screen resize function, which enables you to customize the image size.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲ ▼ buttons to select **Aspect** and then press the Point ► or the OK button.

**2** Use the Point ▲ ▼ buttons to select the desired item and then press the OK button

**Normal**

Provide the image to fit the screen size.

**Full**

Provide the full screen image.

**16:9**

Provide the image at the 16:9 wide screen ratio.

**Zoom**

Scale the image proportionally to fit the entire screen. Either side of image may go over the screen.

**True**

Provide the image in its original size. When the original image size is larger or smaller than the screen size (1024 x 768), the projector enters to the panning mode automatically. Use the Point ▲▼◄► buttons to pan the image. When adjusted, the arrows will turn red. When reached to the correction limits, the arrows will disappear.

**Custom**

Provide the last stored aspect screen image.

**Custom adj.**

Adjust the screen scale and position manually with this function. Press the Point ► button at **Custom adj**. and the Custom adjustment menu is displayed on the screen, you can use the Point ▲ ▼ buttons to choose the item you want to adjust.

**Scale H/V** ...... Adjust the Horizontal/Vertical screen scale.

**H&V** ............... When set to **On**, the aspect ratio is fixed. The **Scale V** appears dimmed and becomes unavailable. Adjust **Scale H**, then the screen scale is automatically modified based on the aspect ratio.

**Position H/V** .. Adjust the Horizontal/Vertical screen position.

**Common** ....... Save the adjusted scale or position to all the inputs. Press the OK button at **Common** to display a confirmation box. To save the scale or position, press the OK button at **Yes**. When **Custom** is selected, the saved scale or position is used.

**Reset** ............. Reset the all adjusted values. Press the OK button at **Reset** to display a confirmation box. To reset, press the OK button at **Yes**.

### Aspect Menu

✓**Note:**
- This projector cannot display any resolution higher than 1920 x 1200. If your computer's screen resolution is higher than it, reset the resolution to the lower before connecting to the projector.
- The image data in other than 1024 x 768 is modified to fit the screen size in initial mode.
- **True** and **Digital zoom +/–** are disabled and cannot be displayed when **480i**, **575i**, **480p** **575p, 720p**,**1035i** or **1080i** is selected in the PC System Menu (p. 31).
- When **True** is selected in the Screen menu, **Digital zoom +/-** can not be selected.

### Custom adj.

✓**Note:**
- When no signal is detected, **Normal** is set automatically .
- The adjustable range for **Scale H/V** and **Position H/V** is limited depending on the input signal.

# Computer Input

### Digital zoom +

Select **Digital zoom +**. The On-Screen Menu disappears and **D. zoom +** appears. Press the OK button to expand the image size. Use the Point ▲▼◄► buttons to pan the image. The Panning function can work only when the image is larger than the screen size. A projected image can be also expanded by pressing the D.ZOOM **+** or the OK button on the remote control unit.

### Digital zoom –

Select **Digital zoom –**. The On-Screen Menu disappears and **D. zoom –** appears. Press the OK button to compress image size.
The projected image can be also compressed by pressing the D.ZOOM **–** or the OK button on the remote control unit.

To exit the Digital zoom +/– mode, press any button except the D.ZOOM **+/–** buttons, OK and Point buttons.

To return to the previous screen size, select a screen size from the Screen Size Adjustment Menu or select an input source from the Input Source Selection Menu (see page 30) again, or adjust the screen size with the D.ZOOM **+/–** buttons.

### Keystone

This function is used to adjust keystone distortion of the  projected image. Use the Point ▲▼ buttons to choose the item you want to adjust.

### Keystone

To correct keystone distortion, press the OK button.
Keystone appears on the screen. Use the Point ▲▼ buttons to correct keystone distortion (p.26).

### Store

To store or reset the keystone correction, press the Point ► button.

**Store** ..........Keep the keystone correction even when the AC power cord is plugged out or turned off the projector.

**Reset**..........Release the keystone correction when the AC power cord is plugged out.

### Ceiling

When this function is set to **On**, the picture will be top/bottom and left/right reversed. This function is used to project the image from a ceiling-mounted projector.

### Rear

When this function is set to **On**, the picture will be left/right reversed. This function is used to project the image from rear of the screen.

### Reset

To reset the adjusted data, select Reset and press the
OK button. A confirmation box appears and then select Yes. All adjustments will return to their previous figures.

## Input Source Selection (COMPONENT, SCART, HDMI)

### Direct Operation

Choose **COMPUTER (COMPONENT)** or **COMPUTER (SCART)** by pressing the COMPONENT or the COMPUTER button on the remote control unit. Choose **HDMI** by pressing the HDMI button on the remote controller.

**Remote control unit**

**HDMI button**

**COMPUTER button**

| COMPUTER (ANALOG PC) |

| COMPUTER (SCART) |

**COMPONENT button**

| COMPUTER (COMPONENT) |

**Input Menu**

### Menu Operation

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select **COMPUTER** and then press the Point ► button.

**3** Use the Point ▲▼ buttons to select **COMPONENT** or **SCART** and then press the OK button.

| COMPONENT | When the input source is coming from video equipment connected to the COMPUTER IN/S-VIDEO IN/COMPONENT IN terminal with a COMPONENT-VGA Cable, select **COMPONENT**.

| SCART | When the input source is coming from video equipment connected to the COMPUTER IN/S-VIDEO IN/COMPONENT IN terminal with a Scart-VGA Cable, select **SCART**.

| HDMI | When video input signal is connected to the HDMI jack, select **HDMI**.

Press the Point ▲▼ buttons to select **COMPONENT** or **SCART**.

✓**Note:**

When the Auto input function is set to **On 1** or **On 2**, the input signal will be searched automatically (p.52).
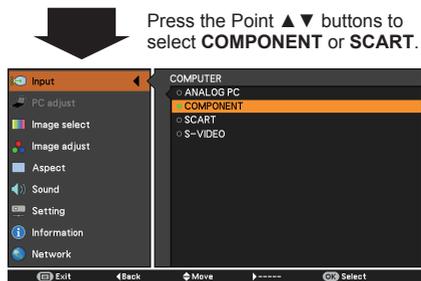

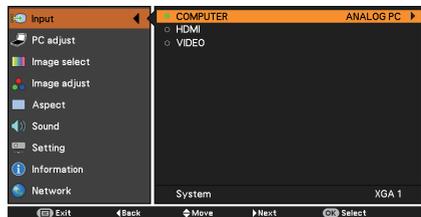

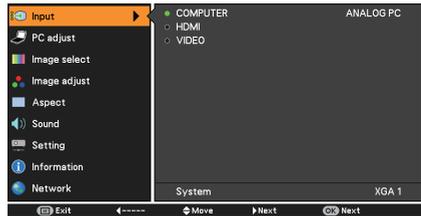

## VIDEO System Selection

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ► or the OK button.

**2** Select **VIDEO**, **COMPUTER (S-VIDEO)** or **COMPUTER (COMPONENT)** input source. (pp. 41-42)

**3** Use the Point ▲▼ buttons to select **System** and then press the Point ► or the OK button. Use the Point ▲▼ buttons to select the desired system and then press the OK button.

**VIDEO or S-VIDEO**

**Auto**
The projector automatically detects an incoming video system, and adjusts itself to optimize its performance. When VIDEO System is **PAL-M** or **PAL-N**, select the system manually.

**PAL/SECAM/NTSC/NTSC4.43/PAL-M/PAL-N**

If the projector cannot reproduce proper video image, select a specific broadcast signal format from among **PAL**, **SECAM**, **NTSC**, **NTSC 4.43**, **PAL-M** and **PAL-N**.

**COMPONENT**

**Auto**
The projector automatically detects an incoming video signal, and adjusts itself to optimize its performance.

**COMPONENT VIDEO SIGNAL FORMAT**
If the projector cannot reproduce proper video image, select a specific component video signal format from among **480i**, **575i**, **480p**, **575p**, **720p**, **1035i** and **1080i**.

✓**Note:**
The AV System Menu cannot be selected when selecting **SCART**.

## Image Mode Selection

### Direct Operation

Select the desired image mode among
**Presentation**, **Standard**, **High contrast**,
**Cinema**, **Blackboard (Green)**, **Colorboard**,
**User 1**, **User 2**, **User 3** and **User 4** by pressing
the IMAGE button on the remote control unit.

### Menu Operation

**1**  Press the MENU button to display the
On-Screen Menu. Use the Point ▲▼
buttons to select **Image select** and then
press the Point ► or the OK button.

**2**  Use the Point ▲▼ buttons to select  the
desired item and then press the OK button.

**Presentation**
For viewing pictures in a bright room.

**Standard**
Normal picture mode preset on the projector.

**High contrast**
Picture mode with improved halftone for
graphics.

**Cinema**
Picture mode adjusted with fine tone.

**Blackboard (Green)**
For the image projected on a blackboard.
This mode helps enhance the image projected
on a blackboard. This is mainly effective on a
green colored board, not truly effective on a
black colored board.

**Colorboard**
At the time of simple projection on the colored
wall, you can get the close color image to the
color image projected on a white screen by
selecting the similar color to the wall color from
the preset four colors.
Use the Point ▲▼ buttons to select
**Colorboard** and then press the Point ► or the
OK button to access the submenu. Press the
Point ▲▼ buttons to select items among Red,
Blue, Yellow and Green.

**User 1-4**
For viewing with the user preset image mode in
the Image Adjust Menu (p. 46).

**Image select Menu**

## Image Adjustment

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Image adjust** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons select the desired item and then press the OK button to display the adjustment dialog box. Use the Point ◄► buttons to adjust the setting value.

**Contrast**

Press the Point ◄ button to decrease the contrast; press the Point ► button to increase the contrast (from 0 to 63).

**Brightness**

Press the Point ◄ button to decrease the brightness; press the Point ► button to increase the brightness (from 0 to 63).

**Color**

Press the Point ◄ button decrease the intensity of the color; press the Point ► button increase the intensity of the color (from 0 to 63).

**Tint**

Press the Point ◄► buttons to adjust the tint value to get a proper color balance (from 0 to 63).

**Auto iris**\*

Press the Point ◄► buttons to select **Off** or **On**.
  **Off** ...... Disabled.
  **On** ...... The Auto iris function is activated.

\* Auto iris is only for LV-7292A, LV-7297A, LV-7392A, LV-8227A.

**Color temp.**

Use the Point ◄► buttons to select the desired Color temp. level (**XLow**, **Low**, **Mid** or **High**).

**White balance (Red / Green / Blue)**

Press the Point ◄ button to lighten R/G/B tone; press the Point ► button to deepen R/G/B tone (from 0 to 63).

**Sharpness**

Press the Point ◄ button to decrease the sharpness of the image; press the Point ► button to increase the sharpness of the image (from 0 to 15).

**Gamma**

Use the Point ◄► buttons to adjust the gamma value to obtain a better balance of contrast (from 0 to 15).

✓**Note:**
  • When the **White balance Red**, **Green** or **Blue** is adjusted, the Color temp. level will change to **User**.
  • **Tint** cannot be selected when the video system is **PAL**, **SECAM**, **PAL-M** or **PAL-N** (p. 43).
  • When **Blackboard (Green)** or **Colorboard** is selected in Image select, **Color temp.** will change to **Blackboard** or **Colorboard**.

# VIDEO Input

### Noise reduction

Noise interference on the screen can be reduced. Select one of the following options to get smoother images.
 **Off**........ Disabled.
 **L 1**........ Lower reduction
 **L 2**........ Higher reduction

### Progressive

An interlaced video signal can be displayed in progressive mode. Select one of the following options.
 **Off**........ Disabled.
 **L 1**........ For an active picture.
 **L 2**........ For a still picture.
 **Film** ..... For watching a film. With this function, the projector reproduces pictures faithful to the original film quality.

### Reset

To reset the adjusted data, select **Reset** and press the OK button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

### Store

To store the adjusted data, select **Store** and press the Point ► or the OK button. Use the Point ▲ ▼ buttons to select one from **User 1** to **User 4** and press the OK button.
A confirmation box appears and then select **Yes**. Stored data can be called up by selecting an **User (1-4)** in the Image Mode Selection on page 44.

**Store Menu**

A confirmation box appears and then select **Yes**.

✓**Note:**
 **Noise reduction** and **Progressive** can not be selected when the input signal is **480p**, **575p**, **720p**, **1035i** or **1080i** (p.43).

## Aspect Setting (For LV-7292A, LV-7297A, LV-7392A, LV-7292M, LV-7297M)

This projector has the picture screen resize function, which enables you to customize the image size.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲ ▼ buttons to select **Aspect** and then press the Point ► or the OK button.

**2** Use the Point ▲ ▼ buttons select the desired item and then press the OK button.

### Normal

Provide the image to fit the screen size while maintaining the aspect ratio of the input signal.

### Full

Provide the full screen image.

### 16:9

Provide the image at the 16:9 wide screen ratio.

### Zoom

Pan the horizontal direction of the image and cut the vertical direction of the image to fit the screen size (16:9). Only for 4:3 video aspect ratio signals.

### Custom

Provide the last stored aspect screen image.

### Custom adj.

Adjust the screen scale and position manually with this function.
Press the Point ► button at **Custom adj.** and the Custom adjustment menu is displayed on the screen, you can use the Point ▲ ▼ buttons to choose the item you want to adjust.

**Scale H/V** ...... Adjust the Horizontal/Vertical screen scale.

**H&V** .............. When set to **On**, the aspect ratio is fixed. The **Scale V** appears dimmed and becomes unavailable. Adjust **Scale H**, then the screen scale is automatically modified based on the aspect ratio.

**Position H/V**.. Adjust the Horizontal/Vertical screen position.

**Common** ....... Save the adjusted scale or position to all the inputs. Press the OK button at **Common** to display a confirmation box. To save the scale or position, press the OK button at **Yes**. When **Custom** is selected, the saved scale or position is used.

**Reset** ............. Reset the all adjusted values. Press the OK button at **Reset** to display a confirmation box. To reset, press the OK button at **Yes**.

### Aspect Menu

✓**Note:**
 • When no signal is detected, **Normal** is set automatically and the Aspect adjustment menu disappears.
 • The adjustable range for **Scale H/V** and **Position H/V** is limited depending on the input signal.

# VIDEO Input

### Keystone

This function is used to adjust keystone distortion of the projected image. Use the Point ▲ ▼ buttons to choose the item you want to adjust.

**Keystone**
To correct keystone distortion, press the OK button.
Keystone appears on the screen. Use the Point ▲ ▼ buttons to correct keystone distortion (p. 26).

**Store**
To store or reset the keystone correction, press the Point ► button.
   **Store** ..........Keep the keystone correction even when the AC power cord is plugged out or turned off the projector.
   **Reset**..........Release the keystone correction when the AC power cord is plugged out.

### Ceiling

When this function is set to **On**, the picture will be top/bottom and left/right reversed. This function is used to project the image from a ceiling-mounted projector.

### Rear

When this function is set to **On**, the picture will be left/right reversed. This function is used to project the image from rear of the screen.

### Reset

To reset the adjusted data, select Reset and press the
OK button. A confirmation box appears and then select Yes. All adjustments will return to their previous figures.

**Keystone**

Press the OK button.

Keystone

**Ceiling**

**Rear**

## Aspect Setting **(For LV-8227A, LV-8227M)**

This projector has the picture screen resize function, which enables you to customize the image size.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Aspect** and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons select the desired item and then press the OK button.

**Normal**

Provide the image to fit the screen size while maintaining the aspect ratio of the input signal.

**Full**

Provide the full screen image.

**16:9**

Provide the image at the 16:9 wide screen ratio.

**Zoom**

Pan the horizontal direction of the image and cut the vertical direction of the image to fit the screen size (16:9). Only for 4:3 video aspect ratio signals.

**Natural wide**

Expand the right and left sides of images naturally without changing the center areas.

**Custom**

Provide the last stored aspect screen image.

**Custom adj.**

Adjust the screen scale and position manually with this function.

Press the Point ► button at **Custom adj.** and the Custom adjustment menu is displayed on the screen, you can use the Point ▲▼ buttons to choose the item you want to adjust.

**Scale H/V** ...... Adjust the Horizontal/Vertical screen scale.

**H&V** ............... When set to **On**, the aspect ratio is fixed. The **Scale V** appears dimmed and becomes unavailable. Adjust **Scale H**, then the screen scale is automatically modified based on the aspect ratio.

**Position H/V**.. Adjust the Horizontal/Vertical screen position.

**Common** ....... Save the adjusted scale or position to all the inputs. Press the OK button at **Common** to display a confirmation box. To save the scale or position, press the OK button at **Yes**. When **Custom** is selected, the saved scale or position is used.

**Reset**............. Reset the all adjusted values. Press the OK button at **Reset** to display a confirmation box. To reset, press the OK button at **Yes**.

**Aspect Menu**

✓**Note:**
 • When no signal is detected, **Normal** is set automatically and the Aspect adjustment menu disappears.
 • The adjustable range for **Scale H/V** and **Position H/V** is limited depending on the input signal.
 • **Natural wide** cannot be selected when **720p**, **1035i**, **1080i** or **1080p** is selected on AV System Menu (p.43).

## Keystone

This function is used to adjust keystone distortion of the  projected image. Use the Point ▲ ▼ buttons to choose the item you want to adjust.

### Keystone
To correct keystone distortion, press the OK button.
Keystone appears on the screen. Use the Point ▲▼ buttons to correct keystone distortion (p. 26).

### Store
To store or reset the keystone correction, press the Point ► button.

  **Store** ..........Keep the keystone correction even when the AC power cord is plugged out or turned off the projector.

  **Reset**..........Release the keystone correction when the AC power cord is plugged out.

## Ceiling

When this function is set to **On**, the picture will be top/bottom and left/right reversed. This function is used to project the image from a ceiling-mounted projector.
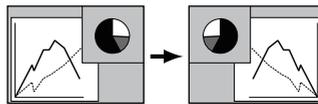

## Rear

When this function is set to **On**, the picture will be left/right reversed. This function is used to project the image from rear of the screen.

## Screen aspect

This function is used to project the image to a 4:3 or 16:9 projection screen.

  **Default (16:10)** ....16:10 is the aspect of the LCD panel. The original Screen Menu is available.
  **16:9** ......................Set to a 16:9 projection screen.
  **4:3** ........................Set to a 4:3 projection screen.

## Reset

To reset the adjusted data, select Reset and press the OK button. A confirmation box appears and then select "Yes". All adjustments will return to their previous figures.

**Keystone**

Press the OK button.

**Ceiling**

**Rear**

✓**Note:**
  • When the 16:9 function is selected on Screen aspect menu, **16:9** is not available in the PC and AV screen (pp.39, 49).
  • When the 4:3 function is selected on Screen aspect menu, **Natural wide** is not available in the AV screen (p.49).

# Setting

## Setting

This projector has a Setting menu that allows you to set up the other various functions described below.

**1** Press the MENU button to display the On-Screen Menu. Press the Point ▲ ▼ buttons to select **Setting** and press the Point ► or the OK button to access the submenu items.

**2** Use the Point ▲ ▼ buttons to select the desired item and then press the Point ► or the OK button to access the selected item.

**3** Use the Point ▲ ▼ buttons to select the desired item and then press the OK button.

**Setting Menu**

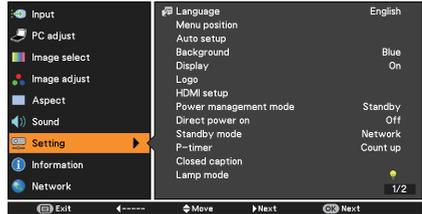

### Language

The language used in the On-Screen Menu is available in English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Turkish, Kazakh, Vietnamese, Chinese, Korean, Japanese and Thai.

**Language**

### Menu position

This function is used to change the position of the On-Screen Menu. Select **Menu position** and press the OK button.

The Menu position changes each time you press OK button as follows.
the center → the bottom left → the bottom right → the top left → the top right→.....
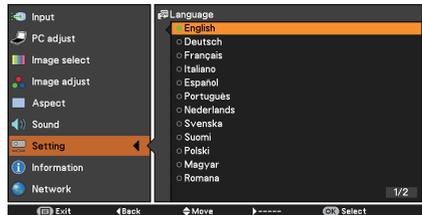

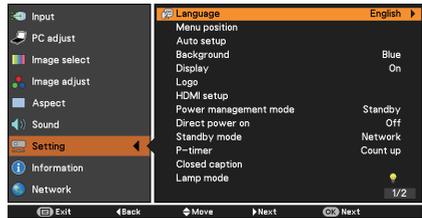

# Setting

## Auto setup

This function enables Auto input, Auto Keystone correction and Auto PC adjustment by pressing the AUTO SET button on the top control or the remote control unit. Settings for those functions can be altered as follows:

### Auto input

This function detects the input signal automatically. When a signal is found, the search will stop. Use the Point ▲▼ buttons to select one of the following options.

**Off** ....... Auto input does not work.

**On 1**..... Auto input works under the following situation.
  –When pressing the AUTO SET button on the top control or the remote control unit.

**On 2**..... Auto input works under the following situation.
  –When turning on the projector by pressing the POWER button on the top control or the remote control unit.
  –When pressing the AUTO SET button on the remote control unit or the top control.
  –When the current input signal is cut off.*

* If the Blank or Freeze function is active, cancel it to activate the Auto input. It is also unavailable when On-Screen menu is displayed.

### Auto PC

**On**..........Enables Auto PC Adjustment when pressing the AUTO SET button on the remote control unit or the top control.

**Off**...........Disables Auto PC Adjustment.

### Auto Keystone

**Auto**.......Always works and corrects keystone distortion according to the projector's tilt.

**Manual**...Works only when pressing the AUTO SET button on the top control or the remote control unit.

**Off**.......... Disables Auto Keystone.

✓**Note:**
 • While **Auto input** is set to **On 1** or **On 2**, the status of Input and Lamp are displayed every time the signal is switched.
 • Only the last selected input source can be detected.

## Auto setup

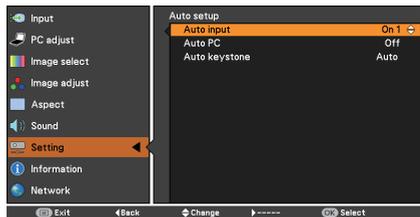

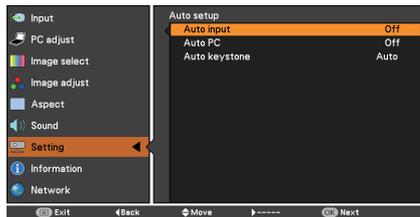

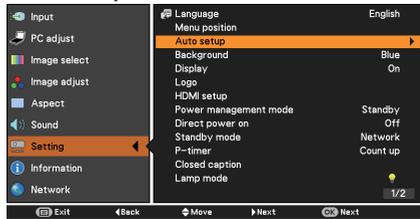

✓**Note:**
 • During **Auto input** is in progress, If the MENU button or the POWER button is pressed, **Auto input** will stop. If the COMPUTER button or VIDEO or COMPONENT or S-VIDEO or HDMI button is pressed, **Auto input** will stop and go back to the button's input signal.
 • **Auto input**, **Auto PC** and **Auto Keystone** can not be set **Off** at the same time.
 • **Auto Keystone** corrects vertical distortion only, not correct horizontal distortion.
 • The Auto Keystone function can not work when the Ceiling feature is set **On** in the Screen menu (pp. 38, 40, 48, 50).
 • Perfect correction of the image distortion can not be ensured with the Auto setup function. If the distortion is not corrected properly by pressing the AUTO SET button, adjust manually by pressing the KEYSTONE button on the remote control unit or selecting **Keystone** in the Setting menu (pp. 26, 38, 40, 48, 50).
 • **Fine sync**, **Total dots**, **Horizontal position** and **Vertical position** of some computers cannot be fully adjusted with the Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp. 33-34).

**Background**

Select the background screen for when no input signal is detected. Press the Point ▲ ▼ buttons to switch between each option.

**Blue**........Project a blue background.
**User**........Project an image captured in the Logo setting.
**Black**......Project a black background.

**Display**

This function decides whether to display On-Screen Displays.

**On**........................ Show all the On-Screen displays. Use this function when you want to project images after the lamp becomes bright enough. The factory default setting is in this option.

**Countdown Off**... Show the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.

**Off**........................ Hide the On-Screen Displays except;
● On-Screen Menu.
● **Power off?** (p. 23)
● P-Timer display. (p. 29)
● **No signal** for Power management (p. 56)
● **Please wait ...**
● Arrows for the True function in the Aspect Menu. (p. 39)

**Logo (Logo and Logo PIN code lock settings)**

This function allows you to customize the screen logo with **Logo select**, **Capture**, **Logo PIN code lock** and **Logo PIN code change** functions.

✓**Note:**
When **On** is selected in the Logo PIN code lock function, **Logo select** and **Capture** functions cannot be selected.

**Logo select**

This function decides on the starting-up display from among following options.

**User**....... Show the image you captured.
**Default**... Show the factory-set logo.
**Off**.......... Show the countdown display only.

**Logo select**

# Setting
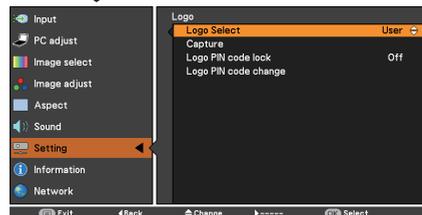

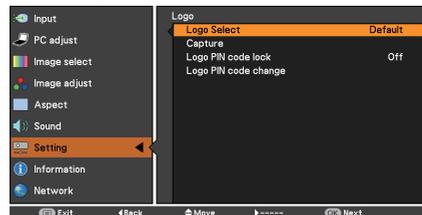

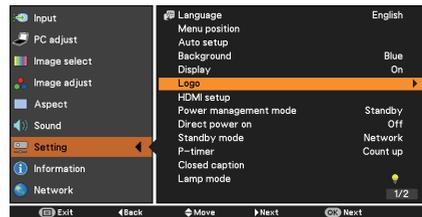

### Capture

This function enables you to capture an image being projected to use it for a starting-up display or interval of presentations.

Select **Capture** and press the OK button. A confirmation box appears and select **Yes** to capture the projected image.

After capturing the projected image, go to the Logo select function and set it to **User**. Then the captured image will be displayed the next time you turn on the projector or when you press the BLANK button (p 29).

To cancel the capture function, select **Yes** in the "Quit?" confirmation box.

✓**Note:**
  - Before capturing an image, select **Standard** in the Image select Menu to capture a proper image (pp. 35,44).
  - A signal from a computer can be captured up to panel size (1024 x 768). (Only for LV-7292A, LV-7297A, LV-7392A, LV-7292M, LV-7297M)
  - A signal from a computer can be captured up to panel size WXGA (1280 x 800). A signal from video equipment can be captured except for **1035i** and **1080i**. (Only for LV-8227A, LV-8227M)
  - When capturing the image that has been adjusted by the Keystone function, the adjusted data is automatically reset and the projector captures an image without keystone correction.
  - When Logo PIN code lock function is set to **On**, **Logo select** and **Capture** can not be selected.
  - When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.
  - When there is no captured image or it is interrupted while capturing an image, **User** can not be selected, you can only switch between **Default** and **Off**.

**Capture**

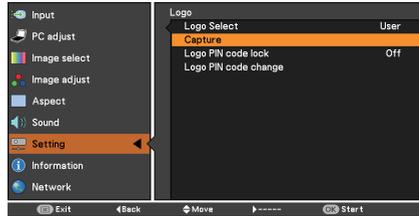

### Logo PIN code lock

This function prevents an unauthorized person from changing the screen logo.

  **Off**.......... The screen logo can be changed freely from the Logo Menu (p. 53).
  **On**.......... The screen logo cannot be changed without a Logo PIN code.

If you want to change the **Logo PIN code lock** setting, press the OK button and the Logo PIN code dialog box appears. Enter a Logo PIN code by following the steps below. The initial **Logo PIN code** is set to "4321" at the factory.

**Logo PIN code lock**

# Setting

## HDMI setup

This function is only used for HDMI input source.

**Image**

Select **Normal** or **Enhanced** to match the video range setting of your HDMI Digital RGB equipment.

**Sound**

**HDMI**: When using the HDMI cable, select **HDMI**. Both video and audio are transferred and you need not to connect any additional cables for audio.

**COMPUTER** : When using the DVI-HDMI cable, select **COMPUTER** and connect the audio cable to COMPUTER IN terminal.

The names for the output setting of Digital RGB vary from equipment to equipment. For details, refer to the user's manual of your Digital RGB equipment.
When the black parts of the image are destroyed or stand out, please switch to **Normal** or **Enhanced**, and then switch the output type of the HDMI Digital RGB output equipment.

## Power management mode

For reducing power consumption as well as maintaining the lamp life, the Power management mode function turns off the projection lamp when the projector is not operated for a certain period.

Select one of the following options:

**Standby**........ When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp will be turned on if the input signal is reconnected or any button on the top control or remote control unit is pressed.

**Exit** .............. When the lamp has been fully cooled down, the power will be turned off.

**Off**................. Power management mode function is off.

**Timer** ............ If the input signal is interrupted and no button is pressed for more than 30 seconds, the timer display with **No signal** appears. It starts the countdown until the lamp is turned off. Use the Point ▲▼ buttons to set the Timer (1~30min).

✓**Note:**

Factory default is **Standby: 5 min**.

## Direct power on

When this function is set to **On**, the projector will be automatically turned on just by connecting the AC power cord to a wall outlet.

## HDMI setup

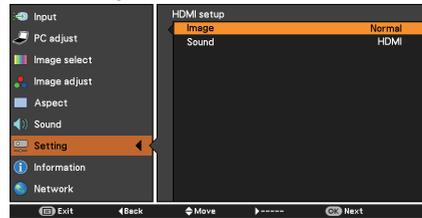

## Power management mode

Time left before Lamp is off.

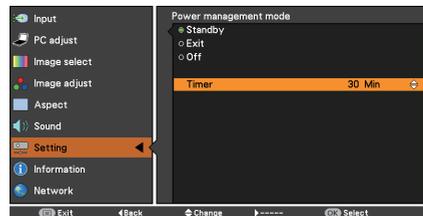

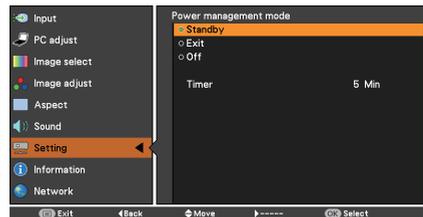

✓**Note:**

Be sure to turn off the projector properly (see "Turning Off the Projector" on page 23). If the projector is turned off in the incorrect sequence, the Direct power on function will not work properly.

### Standby mode

This function is available when operating the projector via network.

**For LV-7292A, LV-7297A, LV-7392A, LV-8227A:**

**Network**.. Supply the power to the network function even after turning off the projector by pressing the POWER button on the remote control unit.

**Eco** ......... Select **Eco** when you do not use the projector via network. The projector's network function will stop when turning off the projector, you can not turn on the projector via network.

Refer to the user's manual of "Network Set-up and Operation".

**For LV-7292M, LV-7297M, LV-8227M:**

**Serial** ...... Does not restrict functionality even in standby mode.

**Eco** ......... Restricts some functions in standby mode to reduce power consumption.

### P-timer

This function allows you to change the setting of the P-timer and execute it.

Select one of the following options:

**Count up** ....... The P-timer display **000:00** appears on the screen and the count up starts (**000:00-180:00**)

**Count down** .. The time set in the Timer setting appears on the screen and the countdown starts.

**Timer** ............. Use the Point ▲▼ buttons to set the Timer (**1-180 Min**). **Timer** is available in Count down only. Factory default velue is **10 Min**.

**Start**............... It executes the count up or count down function. Press the OK button at **Start** and the indication changes into Stop. To stop **Count up** or **Count down**, press the OK button at **Stop** on the screen menu, then the indication changes into **Restart**. Press the OK button at **Restart** to resume **Count up** or **Count down**.

**Reset** ............. Reset the P-timer values. Press the OK button at **Reset** to return to the following value;
  **Count up** ... "000:00"
  **Count down** ... Timer that you set

**Exit** ................ To exit the P-timer operation.

X: disabled    O: enabled

|  | **Eco** | **Network/Serial** |
|---|---|---|
| Serial command | X | O |
| Network*2 | X | O |
| Audio Out | X | X *1 |
| Direct power on | O | O |

*1 When switch the STANDBY MIC OUT function **On** in Standby mode status, only MIC volume can be output.
*2 **Network** is only for LV-7292A, LV-7297A, LV-7392A, LV-8227A.

✓**Note:**
  • When selecting **Network**, the cooling fans may be running depending on the temperature inside the projector even if the projector is turned off.
  • When **Eco** is selected and the projector is in Standby mode, the communication of RS-232C serial port is not available.
  • N**etwork** is only for LV-7292A, LV-7297A, LV-7392A, LV-8227A.

### P-TIMER

**111 : 11**

P-timer display
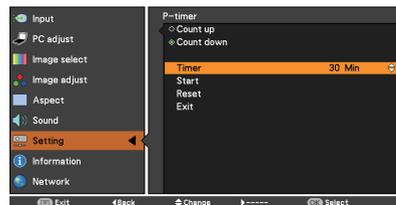

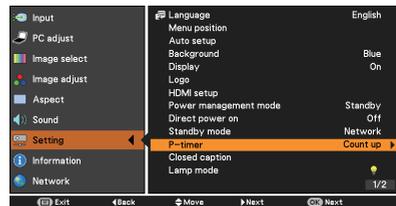

**Stop or Cancel the P-timer via Remote control unit**
To stop the P-timer function, press the P-TIMER button. To cancel the P-timer, press and hold the P-TIMER button for a few seconds.

# Setting

## Closed Caption

Closed Caption is a printed version of the program sound or other information displayed on the screen. If the input signal contains closed captions, you can turn on the feature and switch the channels. Press the Point ▲ ▼ buttons to select **Off**, **CC1**, **CC2**, **CC3** or **CC4**.
If the closed caption is not clear, you can change the text from **Color** to **White**.

**Closed Caption**
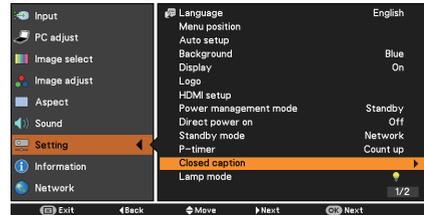

Press the Point ▲ ▼ buttons to select **Off**, **CC1**, **CC2**, **CC3** or **CC4**, and then press the OK button.

✓**Note:**
 The Closed Caption is available only under the situation below.
 • When the input signal is **COMPONENT** (for adjustment only), **VIDEO** or **S-VIDE**O, and the system is set to **Auto**, **NTSC** or **480i**, the Closed caption is available.
 • If the system is set to **Auto**, and choose **NTSC** or **480i** as the input signal, the Closed caption function will be available.
 • **Closed caption** will be unavailable when under other setting conditions.
 • The Closed caption function is unavailable when On-Screen menu and P-timer are displayed.
 • The menu items of Closed Caption are displayed in gray while it is not available.

58

---

Lamp mode

This function allows you to change brightness of the screen.

☀ High........... Brighter than the Normal mode.
◉ Normal ...... Normal brightness
◉ Eco............ Lower brightness reduces the lamp power consumption and extends the lamp life.

✓**Note:**

• Lamp mode can not be changed for a while after turning on the projector. Lamp needs some time to stabilize after the power is turned on. Stored lamp mode will be active after the lamp is stabilized.

Remote control

This projector provides two different remote control codes: the factory-set initial code (**Code 1**) and the secondary code (**Code 2**). This switching function prevents remote control unit interference when operating several projectors or video equipment at the same time.
When operating the projector in **Code 2**, both the projector and the remote control unit must be switched to **Code 2**.

**To change the code for the projector:**
Select either **Code 1** or **Code 2** in this Setting Menu.

**To change the code for the remote control unit:**
Press and hold both the MENU and IMAGE buttons together for 5 seconds or more.  After changing the code, make sure the remote control unit operates properly.

✓**Note:**
• When different codes are set on the projector and on the remote control unit, any operation cannot be made. In that case, switch the code on the remote control unit to fit the code on the projector.
• If the batteries are removed from the remote control unit for a long period of time, the remote control code will be reset.

**Remote control**
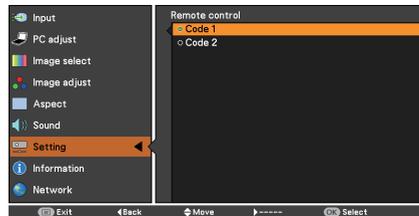

# Setting

🔒 **Security (Key lock and PIN code lock)**

This function allows you to use the Key lock and PIN code lock function to set the security for the projector operation.

## Key lock

This function locks the top control and remote control unit buttons to prevent operation by unauthorized persons.

Select **Key lock** and then press the OK button, and select the desired item by pressing the Point ▲ ▼ buttons.

🔓 .... Unlocked.

🔒 .... Lock the operation of the top control. To unlock, use the remote control unit.

🔒 .... Lock the operation of the remote control unit. To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control unit nearby or there is something wrong with your remote control unit, contact the dealer where you purchased the projector or the service center.

**Key lock**

## PIN code lock

This function prevents the projector from being operated by unauthorized persons and provides the following setting options for security.

**Off**.......... Unlocked.
**On 1**....... Enter the PIN code every time turning on the projector.
**On 2**....... Enter the PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without a PIN code.

Whenever you change the PIN code lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. The "1234" is set as the initial PIN code at the factory.

If you want to change the PIN code lock setting, press the OK button and the PIN code dialog box appears.

When the projector is locked with the PIN code, the Security icon appears on the guide.

**PIN code lock**

When the projector is locked with the PIN code, the Security icon appears on the guide.

### Enter a PIN code

Use the Point ▲ ▼ buttons to enter a number. Press the Point ◄ ► buttons to fix the number and move the red frame pointer to the next box. The number changes to ✳. If you fixed an incorrect number, use the Point ◄ ► buttons to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to **Set**. Press the OK button so that you can change the following PIN code lock setting.

If you entered an incorrect PIN code, **PIN code** and the number (✳✳✳✳) will turn red for a moment. Enter the correct PIN code all over again.

### Change the PIN code lock setting

Use the Point ▲ ▼ buttons to select **Off**, **On 1** or **On 2**, and then press the OK button to make a choice.

### Change the PIN code

The PIN code can be changed to your desired four-digit number. Press the OK button to select **PIN code change**. Pin code dialog box appears, use the Point ▲ ▼ buttons to enter the correct code. The New PIN code input dialog box appears. Set a new PIN code.

**CAUTION:**
**WHEN YOU HAVE CHANGED THE LOGO PIN CODE, WRITE DOWN THE NEW PIN CODE AS A REMINDER. IF YOU FORGET YOUR PIN CODE, THE PROJECTOR CAN NO LONGER BE STARTED.**

✓**Note**:
If you forget your PIN code and unable to change it, the PIN code can be reset to the factory default setting (1234) according to the following procedures.
When you reset the PIN code, the Logo PIN code and Key lock will be reset, as well.
1. Unplug the AC Power Cord from the AC outlet.
2. Hold down the OK button on the projector and connect the AC Power Cord into the outlet again. Keep holding down the OK button until the POWER indicator lights. The PIN code returns to the factory default setting while the PIN code lock state will remain the same as the previous set state.

**Enter a PIN code**

**Change the PIN code**

OK button

Enter current PIN code to confirm
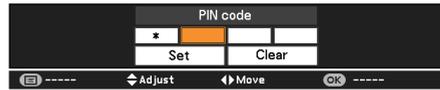

Enter new PIN code
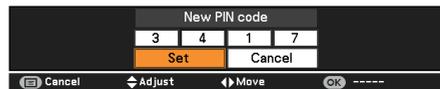

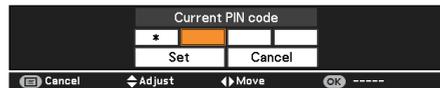

Select Yes to finish the new PIN code setting.

## Fan

This function provides the following options in the cooling fans' operation when the projector is turned off (p.23).
**L 1**.... Normal operation
**L 2**.... Slower, lower-sound and longish-time than the normal operation (**L 1**).

## Fan control

Choose the running speed of cooling fans from the following options according to the ground elevation under which you use the projector.

**Off**................ Normal speed. Set this function to Off when using the projector in non- high altitude environment.
**On 1**............. Faster than Off mode. Select this mode when using the projector in high altitudes (about 1,000 meters to 2,000 meters above the sea level) where the fans have less cooling effect.
**On 2**............. Faster than On 1 mode. Select this mode when using the projector in higher altitudes (about 2,000 meters to 3,000 meters above the sea level) where the fans have lesser cooling effect.

✓**Note**:
The fan noise becomes louder in **On 1** and **On 2**.

## Video delay control

When you want to make a digital processing of a projected image faster, set this function.
Use the Point ▲▼ buttons, select an item of **Off** or **On**.

✓**Note**:
**Noise reduction** and **Progressive** can not be selected when Video delay control function is set to **On**.

## Lamp counter

Be sure to reset the Lamp replacement counter after the lamp is replaced. (p.68)
Press the Point ▲▼ buttons to choose the Lamp counter function and then press the Point ► or the OK button to access the submenu items.

**Lamp counter**................This item shows the total accumulated time of the lamp usage.
**Lamp counter reset**.......Press the OK button to choose **Lamp counter reset**. Select **Yes** in the confirmation box if you want to reset the lamp counter, and then choose **Yes** in the second confirmation box to reset lamp counter.

**Lamp counter reset**

**Setting**
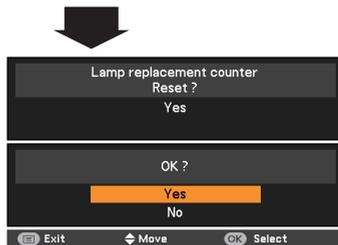

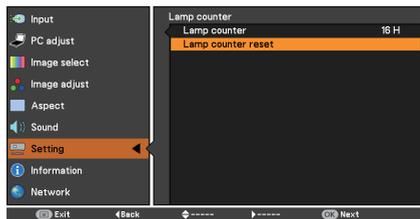

### Filter counter

This function is used to set a frequency for the filter cleaning.
Use the Point ▲▼ buttons to select Filter counter and then press the Point ► or the OK button to access the submenu items.

**Filter counter**.........Show the total accumulated time of the filter use timer setting.
**Timer**.....................To set a timer, when the projector reaches the time, the Filter warning icon (Fig.1) appears on the screen and the total accumulated time turns red, indicating that the filter replacement is necessary.
**Filter counter reset**...After replacing the filter, be sure to reset the timer. The Filter warning icon will not turn off until the filter counter is reset. For details about resetting the timer, refer to "Resetting the Filter Counter" on page 66.

**Fig.1** Filter warning icon

Filter warning icon appears on the screen at a set time (**Off/2000H/3000H/4000H**).

✓**Note:**
 •  This icon also appears at turning on.
 •  The Filter warning icon (Fig.1) will not appear when the Display function is set to **Off** (p.53), during **Freeze** (p.28), or **Blank** (p.29).

### Warning log

This function records anomalous operations while the projector is in operation and use it when diagnosing faults. Up to 10 warning logs are displayed with the latest warning message at the top of the list, followed by previous warning messages in chronological order.

✓**Note:**
 When the Factory default function is executed, all the warning log records will be deleted.

### Factory default

This function returns all setting values except for the **User logo**, **PIN code lock**, **Logo PIN code lock**, **Lamp counter** and **Filter counter** to the factory default settings.

**Filter counter**

Press the OK button to select **Timer**, and then use the Point ▲▼ buttons to set the timer. Select from (**Off/2000H/3000H/4000H**) depending on the use environment.

**Factory default**

# Information

## Input Source Information Display

The Information Menu is used for checking the status of the image signal being projected and the operation of the projector.

### Direct Operation

Press the INFO. button on the remote control unit to display the Information Menu.

### Menu Operation

Press the Point ▲ ▼ buttons to select the Information. The Information Menu is displayed.

See below for displayed information.

 **Input**

The selected input source is displayed.

 **H-sync freq.**
The horizontal frequency of the input signal is displayed in **KHz**, or **- - - - KHz** when no signal.

 **V-sync freq.**
The vertical frequency of the input signal is displayed in **Hz**, or **- - - - Hz** when no signal. Numbers of Hz doubles when during Interlace.

 **Aspect**
The selected Screen size is displayed.

 **Language**
The selected language is displayed.

 **Lamp status**
The selected lamp mode is displayed.

 **Lamp counter**
The cumulative lamp operating time is displayed.

 **Power management mode**
**Off**, **Standby** or **Exit**, and **Timer** are displayed.

 **Key lock**
The selected Key lock icon is displayed.

 **PIN code lock**
**Off** or **On 1** or **On 2** is displayed.

 **Remote control**
The selected remote code  is displayed.

 **SERIAL NO.**
The serial number of the projector is displayed. The serial number is used to service the projector.

**Remote control unit**

INFO. button

**Information Menu**

| Input | COMPUTER ANALOG PC |
|---|---|
| H−sync freq. | 43.4 KHz |
| V−sync freq. | 60.0 Hz |
| Aspect | Normal |
| Language | English |
| Lamp status | |
| Lamp counter | 150 H |

| | 5 Min |
| Key lock | |
| PIN code lock | On 1 |
| Remote control | Code 1 |
| SERIAL NO. | 00000000 |
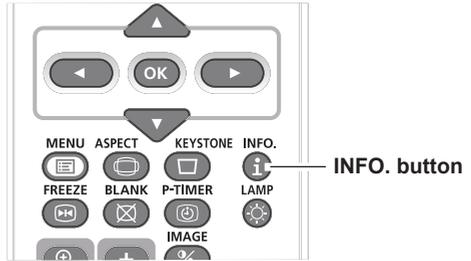

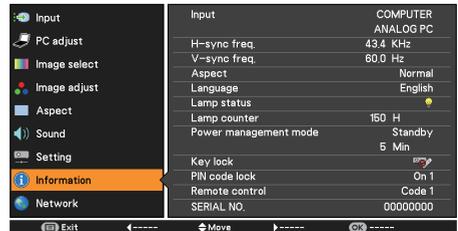

# Maintenance and Cleaning

## WARNING indicator

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

**The projector is shut down and the WARNING indicator is blinking red.**

When the temperature inside the projector reaches a certain level, the projector will be automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the POWER button.

✓**Note:**
The WARNING indicator continues to blink even after the temperature inside the projector returns to normal. When the projector is turned on again, the WARNING indicator stops blinking.

**Top Control**

```
              ○
           (｜) POWER
WARNING ○                      WARNING
           ‾‾‾‾‾               blinking red

☼ LAMP REPLACE ○    (A) AUTO SET

              △
VOL  (◁)     (▷) VOL
 −              +
              ▽
```
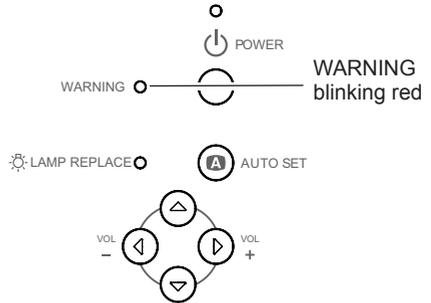

**Then check the matters below:**

– Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if the air vents of the projector are not blocked.
– Has the projector been installed near an Air-Conditioning/ Heating Duct or Vent? Move the installation of the projector away from the duct or vent.
– Is the filter clean? Clean the filter periodically.

**The projector is shut down and the WARNING indicator lights red.**

When the projector detects an abnormal condition, it is automatically shut down to protect the inside of the projector and the WARNING indicator lights red. In this case, unplug the AC power cord and reconnect it, and then turn the projector on once again to verify operation. If the projector cannot be turned on and the WARNING indicator still lights red, unplug the AC power cord and contact the service center.

**Top Control**

```
              ○
           (｜) POWER
WARNING ○                      WARNING
           ‾‾‾‾‾               lights red

☼ LAMP REPLACE ○    (A) AUTO SET

              △
VOL  (◁)     (▷) VOL
 −              +
              ▽
```
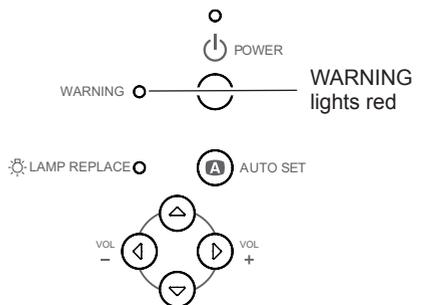

⚠ **WARNING**
**DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER AN ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.**

# Maintenance and Cleaning

## Replacing the Filter

Filter prevents dust from accumulating on the optical elements inside the projector. Should the Filter become clogged with dust particles, it will reduce cooling fans' effectiveness and may result in internal heat buildup and adversely affect the life of the projector.  If a "Filter warning" icon appears on the screen, replace the Filter immediately. Replace the filter by following the steps below.

**1** Turn off the projector, and unplug the AC power cord from the AC outlet.

**2** Place the latch in the OPEN position and pull out the filter in the arrow direction.

**3** Slide the new filter (along the guide rails. Make sure that the filter is inserted completely.) Place the latch back in the LOCK position.

**4** Connect the AC power cord to the projector and turn on the projector.

**5** Reset the filter counter.
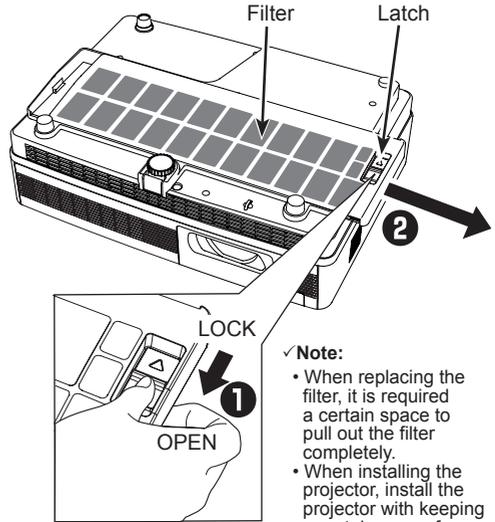

**CAUTION**
- Do not operate the projector with the filter removed. Dust may accumulate on the optical elements degrading picture quality.
- Do not put anything into the air vents. Doing so may result in malfunction of the projector.
- Do not wash the filter with water or any other liquid Matter. Otherwise the filter may be damaged.

**RECOMMENDATION**
**We recommend avoiding dusty/smoky environments when you operate the projector.  Usage in these environments may cause poor image quality.**
When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector degrading the quality of a projected image.  When the symptoms above are noticed, contact your authorized dealer or service center for proper cleaning.

Filter        Latch

LOCK

✓**Note:**
  • When replacing the filter, it is required a certain space to pull out the filter completely.
  • When installing the projector, install the projector with keeping a certain space for replacing the filter.

OPEN

## Resetting the Filter Counter

Be sure to reset the Filter counter after cleaning or replacing the filter.

**1** Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Setting and then press the Point ► or the OK button.

**2** Use the Point ▲▼ buttons to select **Filter counter** and then press the Point ► or the OK button. Use the Point ▲▼ buttons to select **Filter counter reset** and then press the OK button. **Filter counter Reset?** appears. Select **Yes** to continue.

**3** Another confirmation dialog box appears, select **Yes** to reset the Filter counter.

**Filter counter reset**
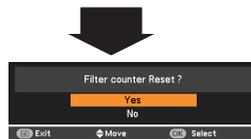

**Filter counter Reset?** appears.
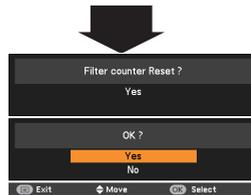

Select **Yes**, then another confirmation box appears.

Select **Yes** again to reset the Filter counter.

## Attaching the Lens Cap

When moving this projector or while not using it over an extended period of time, attach the lens cap.

Attach the lens cap according to the following procedures.

*1* Thread the string through the hole on the lens cap and then tie a knot in the string to secure it in place.

*2* To pass the other end of the string into the hole on the bottom of the projector and pull at it.
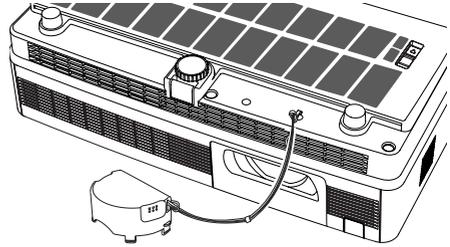

## Cleaning the Projection Lens

Unplug the AC power cord before cleaning.

Gently wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use a lens cleaning paper or commercially available air blower to clean the lens.

Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of the lens.
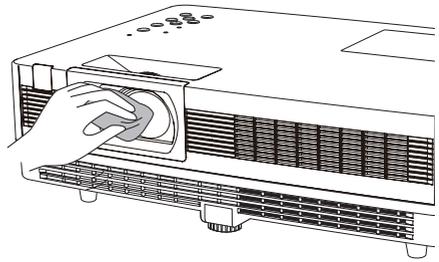

## Cleaning the Projector Cabinet

Unplug the AC power cord before cleaning.

Gently wipe the projector body with a soft dry cleaning cloth. When the cabinet is heavily soiled, use a small amount of mild detergent and finish with a soft dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of the cabinet.

When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.
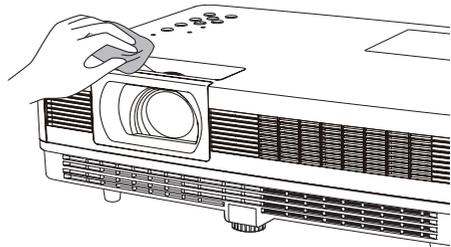

## ⚠ CAUTION

Do not use any flammable solvents or air sprays on the projector and in its vicinity. The explosion or fire hazard may occur even after the AC power cord is unplugged because the temperature inside the projector is extremely high due to the lamps. In addition, there is a risk that the internal parts may be damaged not only by the flammable air spray but also by the cold air.

## Maintenance and Cleaning

### Lamp Replacement

When the projection lamp of the projector reaches its end of life, the Lamp replacement icon appears on the screen and LAMP REPLACE indicator lights yellow. Replace the lamp with a new one promptly. The timing when the LAMP REPLACE indicator should light is depending on the lamp mode.

**Top Control**

☼ LAMP REPLACE

**LAMP REPLACE indicator lights yellow**

✓**Note:**

• The image will be displayed for about 10 seconds.
• The Lamp replacement icon will not appear when the Display function is set to **Off** (p.53), during **Freeze** (p.28), or **Blank** (p.29).

---

## CAUTION

Allow a projector to cool for at least one hour before you open the Lamp Cover. The inside of the projector can become very hot.

## ⚠ CAUTION

For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

## ⚠ CAUTION

When replacing the lamp because it has stopped illuminating, there is a possibility that the lamp may be broken.
If replacing the lamp of a projector which has been installed on the ceiling, you should always assume that the lamp is broken, and you should stand to the side of the lamp cover, not underneath it. Remove the lamp cover gently. Small pieces of glass may fall out when the lamp cover is opened. If pieces of glass get into your eyes or mouth, seek medical advice immediately.

---

Follow these steps to replace the lamp.

**1** Unplug the AC power cord. Let the projector cool for at least one hour.

**2** Loosen the screw and open the lamp cover.

**3** Loosen the three (3) screws that secure the lamp. Lift the lamp out of the projector by using the handles.

**4** Replace the lamp with a new one and secure the three (3) screws. Make sure that the lamp is set properly. Close the lamp cover and secure the screw.

**5** Connect the AC power cord to the projector and turn on the projector.

**6** **Reset the lamp counter.**
See "Lamp Counter" on page 62.

## ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- **Model No. of your projector : LV-7292A, LV-7297A, LV-7392A, LV-8227A, LV-7292M, LV-7297M, LV-8227M**

- **Replacement Lamp Type No.: LV-LP35**

# ⚠ CAUTION

# LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly.
Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.

- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down.
  (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.

- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

**IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.**

If a lamp explodes, disconnect the projector's AC plug from the AC outlet immediately. Contact an authorized service center for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

# Appendix

## Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.
– Make sure you have properly connected the projector to peripheral equipment as described on pages 17-19.
– Make sure all equipment is connected to AC outlet and the power is turned on.
– When the projector does not project an image from the connected computer, restart the computer.

| Problem: | – Solutions |
|---|---|
| **No power** | – Plug the power cord of the projector into the AC outlet.<br>– See if the POWER indicator lights red.<br>– Wait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red. See page 21.<br>– Check the WARNING indicator. If the WARNING indicator lights red, projector cannot be turned on. See page 70.<br>– Check the projection lamp. See page 68.<br>– Unlock the Key lock function for the projector. See page 60. |
| **The initial display is not shown.** | – Make sure **Off** or **Countdown off** are not chosen at display function. See page 53. |
| **The initial display is not same as the default set.** | – Make sure **User** or **Off** are not chosen at Logo (select) function. See page 53. |
| **Input signal switches automatically. (or does not switch automatically)** | – Make sure Auto input function is adjusted properly. See page 52. |
| **When the projector is on and you press the input source buttons, an icon other than the Lamp mode icon appears**. | – That is the Filter warning icon. See page 60. |
| **An icon other than Input mode or Lamp mode icon appears.** | – That is the Lamp replacement icon or the Filter warning icon. See page 68 or 60. |
| **Image is out of focus.** | – Adjust focus of the projector. See page 26.<br>– Provide proper distance between the projector and the projection screen. See page 15.<br>– Check the projection lens to see if it needs cleaning. See page 67.<br>– Moving the projector from a cool to warm place may result in moisture condensation on the projection lens. In such cases, leave the projector off and wait until condensation evaporates. |
| **Image is Left/Right reversed.**<br>**Image is Top/Bottom reversed.** | – Check the Ceiling/Rear function. See pages 38,40,48,50.<br>– Check the Ceiling function. See pages 38,40,48,50. |
| **Picture is not bright enough.** | – Check if the **Contrast** or **Brightness** is adjusted properly. See pages 36, 45.<br>– Check if **Image mode** is selected properly. See pages 35,44.<br>– Check the Lamp mode function. See pages 28, 59.<br>– Check the LAMP REPLACE indicator. If it lights, the end of lamp life is approaching. Replace the lamp with a new one promptly. See page 68. |

| | |
|---|---|
| **No image** | – Check the connection between your computer or video equipment and the projector. See pages 17-19. |
| | – See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer's instruction manual for the setting. |
| | – It takes about 30 seconds to display an image after turning on the projector. See page 21. |
| | – Check the Input signal, color system, video system or computer system mode. |
| | – Make sure the temperature is not out of the specified Operating Temperature (41˚F–95˚F [5˚C–35˚C]). |
| | – When **Blank** is operating, the image cannot be displayed. Press the BLANK button or any other button on the remote control unit. |
| **No sound** | – Check the audio cable connection from audio input source. |
| | – Adjust the audio source. |
| | – Press the Volume + button. See page 27. |
| | – Press the Mute button. See page 27. |
| | – When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available. |
| | – Is the image projected? You will hear the Computer and VIDEO sound only when the image is projected. |
| **The color is strange.** | – Check the Input signal, color system,video system or computer system mode. |
| | – Make sure the **Blackboard** is not selected on Image select menu. See pages 35,44. |
| **Some displays are not seen during the operation.** | – Check the Display function. See page 53. |
| **Auto PC adjustment function does not work.** | – Check the Input signal. Auto PC adjustment function can not work when **480p**, **575p**, **720p**, **480i**, **575i**, **1035i** or **1080i** is selected (see page 31), or when the signal is coming from the HDMI terminal. |
| **The setting does not remain after turning off power.** | – Make sure you selected **Store** after adjusting setting. Some settings can not be stored if not registered with **Store**. See pages 36,46. |
| **Power management mode does not work.** | – Power management mode function can not work while **Freeze** or **BLANK** function is running. See page 56. |
| **Capture function does not work.** | – Check the connection and the input signal to see if there is signal. |
| **Auto setup does not work properly.** | – Make sure **Off** is not selected at any function of **Auto setup**. See page 52. |
| | – Make sure **On** is not selected at the Ceiling function. See pages 38,40,48,50. |
| **Auto keystone function does not work even when the projector is tipped.** | – Make sure the Auto keystone function is not set to **Manual**. Press the AUTO SET button on the top control. See pages 26, 52. |

71

# Appendix

| | |
|---|---|
| **The image is distorted or runs off.** | – Check **PC adjust** menu or **Screen** menu and adjust them. See pages 33-34, 38-40. |
| **PIN code dialog box appears at start-up.** | – PIN code lock is being set. Enter a PIN code (the "1234" or numbers you have set). See pages 22, 60-61. |
| **The Remote control unit does not work.** | – Check the batteries.<br>– Make sure no obstruction is between the projector and remote control.<br>– Make sure you are not too far from the projector when using the remote control unit. Maximum operating range is 16.4'(5 m).<br>– Make sure the code of the remote control unit is conformed to the projector's code. See page 59.<br>– Unlock the Key lock function for the remote control unit function. See page 60. |
| **Indicator blinks or lights.** | – Check the status of the projector with referring to "Indicators and projector Condition". See page 75. |
| **The exclamation mark appears on the screen.** | – Your operation is invalid. Operate correctly. |
| **Top control does not work.** | – The top control is not available if the top control is locked at **Key lock** under **Security** of Setting section. See page 60. |
| Service appears on the screen | – The projector detects an abnormal condition. Unplug the AC power cord and contact the dealer where you purchased the projector or the service center. |

**WARNING :**
**High voltages are used to operate this projector. Do not attempt to open the cabinet.**

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service.

## Indicators and Projector Condition

Check the indicators for projector condition.

| Indicators | | | Projector Condition |
|---|---|---|---|
| POWER red/green | WARNING red | LAMP REPLACE yellow | |
| ● | ● | ● | The projector is off. (The AC power cord is unplugged.) |
| ⊘ | ● | ✶ | The projector is in stand-by mode. Press the POWER button to turn on the projector. |
| ○ | ● | ✶ | The projector is operating normally. |
| ⊘ blinks | ● | ✶ | The projector is preparing for stand-by or the projection lamp is being cooled down. The projector cannot be turned on until cooling is completed and the POWER indicator stops blinking. |
| ○ blinks | ● | ✶ | The projector is in the Power management mode. The lamp lights up when operating the projector, and the projector begins to work. |
| ⊘ blinks | ⊘ blinks | ✶ | The temperature inside the projector is abnormally high. The projector cannot be turned on. When the projector is cooled down enough and the temperature returns to normal, the POWER indicator stops blinking and the projector can be turned on. (The WARNING indicator keeps blinking.) |
| ⊘ | ⊘ blinks | ✶ | The projector has been cooled down enough and the temperature returns to normal. When turning on the projector, the WARNING indicator stops blinking. Please check the Air filter. |
| ● | ⊘ | ✶ | The projector detects an abnormal condition and cannot be turned on. Unplug the AC power cord and plug it again to turn on the projector. If the projector is turned off again, unplug the AC power cord and contact the dealer or the service center for service and checkup. Do not leave the projector on. It may cause an electric shock or a fire hazard. |
| ✶ | ✶ | ◯ | Reaches recommended replacement time. The icon appearing on the top right corner of the image indicates the replacement of the lamp. Please replace the lamp as soon as possible. The time before the LAMP REPLACE indicator lighting up, depends on the operating conditions (the state of the lamp mode). |

○ • • • green.    ⊘ • • • red    ○ • • • blinks green.    ⊘ • • • blinks red.

◯ • • • yellow.    ● • • • off

✶ When the projection lamp reaches its end of life, the LAMP REPLACE indicator lights yellow. When this indicator lights yellow, replace the projection lamp with a new one promptly. (pp. 62,68)

## Compatible Computer Specifications

Basically this projector can accept the signal from all computers with the V-, H-Frequency mentioned below and less than 140 MHz of Dot Clock.
☐ When selecting these modes, PC adjustment can be limited.

| ON-SCREEN DISPLAY | RESOLUTION | H-frekv. (KHz) | V-frekv. (Hz) | ON-SCREEN DISPLAY | RESOLUTION | H-frekv. (KHz) | V-frekv. (Hz) |

✓**Note:**
 • The specifications are subject to change without notice.
 • Depending on your PC settings, the digital signals of your PC may not be projected correctly. In such a case, confirm your PC settings.
 • When you project a DVI signal, connect the cables, turn the projector on, then select the input.
  Finally, turn on your PC. Be sure to follow this procedure, otherwise an image may not be projected on the screen. If an image is not projected correctly, restart your PC.
 • Do not disconnect the cable while the projector is running. If the cable has been disconnected and then reconnected, an image may not be correctly projected.

**Accessories**
   User's Manual (CD-ROM)
   Important Information and Quick Start Guide
   Warranty card
   AC Power Cord
   Remote controller and Batteries
   VGA Cable
   Lens Cap with String
   PIN Code Label
   Ferrite core
   Filter Cover for Ceiling Mount

● The specifications are subject to change without notice.
● LCD panels are manufactured to the highest possible standards. Even though 99.99% of the pixels are effective, a tiny fraction of the pixels (0.01% or less) may be ineffective by the characteristics of the LCD panels.

## Optional Parts

The parts listed below are optionally available. When ordering those parts, specify the item name and Model No. to the sales dealer.

Model No.

**COMPONENT-VGA Cable** : LV-CA32

**S-VIDEO-VGA Cable** : LV-CA33

**Soft Carrying Case** : LV-SC01

**Remote controller** : LV-RC06

**Projector Attachment** : LV-CL17

**Ceiling Attachment** : LV-CL18

**High Ceiling Attachment** : LV-CL19

**Lamp** : LV-LP35

# Appendix

## PJ Link Notice (Only for LV-7292A, LV-7297A, LV-7392A, LV-8227A)

This projector is compliant with PJLink Standard Class 1 of JBMIA (Japan Business Machine and Information System Industries Association). This projector supports all commands defined by PJLink Class 1 and is verified conformance with PJLink Standard Class 1.

For PJ Link password, see the user's manual of "Network Set-up and Operation."

| Projector Input | | PJLink Input | Parameter |
|---|---|---|---|
| COMPUTER | ANALOG PC | RGB 1 | 11 |
| | COMPONENT | VIDEO 3 | 23 |
| | SCART | RGB 2 | 12 |
| | S-VIDEO | VIDEO 2 | 22 |
| HDMI | HDMI | DIGITAL 1 | 31 |
| VIDEO | VIDEO | VIDEO 1 | 21 |

PJLink is a registered trademark of JBMIA and pending trademark in some countries.

**PJLink™**

## Attaching the Filter Cover to the Projector

The supplied filter cover is designed for preventing dust accumulation on the filter when mounting the projector on the ceiling.

**1** Turn over the projector.

**2** Place the filter cover on the filter as the picture shown below.

**3** Attach the projector to the ceiling mount in accordance with the instruction manuals which come with the ceiling mount.

✓**Note:**
- To keep the filter cover in position, be sure to attach the drop-prevention wire by threading it through the hole of the filter cover.
- If the LV-CL17 Projector Attachment is applied, the supplied filter cover is unnecessary.

To Ceiling Mount
