

KONICA MINOLTA

Office system bizhub 420

bizhub 420

The workflow wonder

Impressive and completely **effective**

The bizhub 420 fits snugly into any large department or office, wherein mid-volume copy or print runs are a daily requirement. In one fell swoop it eliminates all the stand-alone black-and-white printers, copiers and faxes which would otherwise clutter up and disturb the effective office environment.

The bizhub 420, with its all-embracing network multi-communication functionality, supports all the needs of the modern progressive office and operations are stunningly easy to activate on the large panel.

Whatever the diverse demands of the active office the bizhub 420 makes light of them all. For instance the machine can switch immediately from a mid-volume copy or print run to a quick scan-to-eMail message, to the printing of individual documents, to the production of a booklet and simultaneously fax an invoice, receive a fax, save a regularly used document for future use or distribute a circular to staff.

Apart from Konica Minolta's Emperon™ print controller technology the bizhub 420 also offers the options of Boxes for document storage, the Super G3 fax suite and comprehensive security functions.

With its productive 42 ppm (A4) copying, excellent handling, versatile finishing features and the optional printing and faxing the bizhub 420 is what the cost-effective, efficient business world needs.

The bizhub 420 is waiting to serve you!

bizhub 420

➔ Ideally operational

The bizhub 420 incorporates a perfect user interface. The control panel can be tilted as required and the enlarged display is particularly suitable for those with a visual impairment. The fast response touch-LCD and the exceptionally clear, straightforward structure mean that even the occasional user will feel completely at home with the bizhub 420.

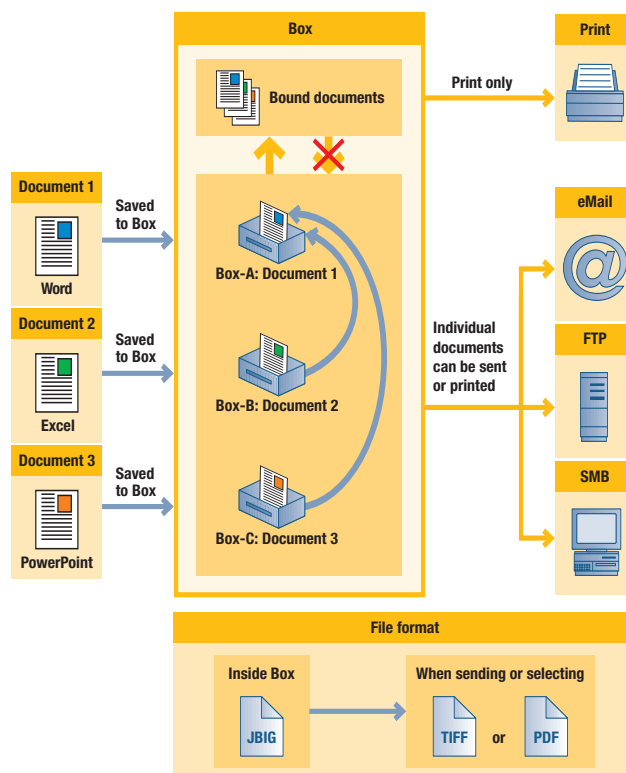

➔ Smooth speedy scanning

The document feeder is fitted as standard on the bizhub 420 and scans up to 70 originals per minute. Thanks to the standard network card scanned documents can be rapidly stored, distributed via scan-to-eMail or shared within the network.

Professional support

→ Full communication

- Installing the 40 GB hard disc makes the distinguished Konica Minolta Box functionality available. An enormous quantity of documents can be stored in up to 1,000 user boxes as required. Documents can thus be retrieved, recombined, reprinted or distributed at will. In addition accessibility can be easily defined across the whole range. This full flexibility is a boon for any lively, efficient office.
- The optional Super G3 fax is the all-in-one solution for office faxing. It is equipped with a whole range of functions, all of which are designed to be both effective cost and time savers. Among them are memory reception and transmission, broadcasting and a good range of one-touch and programme dials which enable faxes to be sent to predefined users or user groups merely at the touch of a button! With the installation of a second fax kit even the simultaneous reception and transmission of faxes is available.

Box functionality: data flow – document storage and distribution

→ Top print definition

- The powerful Emperon™ print controller supports PCL 5e/6 and PS3 printing in all major platforms including Windows, Mac, Unix, SAP and gives an amazingly high resolution of up to 2,400 x 600 dpi. Konica Minolta's polymerised toner Simitri™, a synonym for refined printing, assures superb quality.

features

➔ Top security is essential

The bizhub 420 is easily integrated into the office network. Rest assured, however, that Konica Minolta provides the perfect protection for the shared environment.

- For instance, a print job can be given a password and only once the correct password has been entered at the machine will the print job be executed.
- Similarly the optional hard disc can be protected with a password, stored data can be automatically erased at user selected intervals and the optional encryption tool ensures that the data remains secure even if the hard disc is removed, thus preventing the unauthorised reading of data.
- The bizhub 420 also complies with the latest international security standard ISO 15408 EAL3*. This standard guarantees the prevention of unauthorised access to and tampering with the network and all files.

Excellent handling and finishing

The bizhub 420 is a leading exponent in the art of quality printing and finishing alternatives combined with effective office workflow. Gone are the days of inconvenient and costly out-sourcing.

The bizhub 420 just keeps on running thanks to the high capacity consumables and the standard paper supply of an impressive 1,150 sheets, which can be augmented with the optional paper cabinets up to a massive 5,650 sheets.

And with amazing speed it takes everything in its stride. Whether it's a presentation, special post-cards, a circular letter with printed envelopes, high-volume document printing, invoices or promotional material, the stunning range of paper input – including any thickness from 50 g/m² to 210 g/m², any size from A6 up to A3 – enables the bizhub 420 to easily produce the wide variety of top quality printed matter that is required.

Extensive finishing options, from offset sorting to booklet production, further heighten the image of the document and complete the professional approach.

Effective quality, versatility, efficiency and dependability. Who could ask for more?
